

Dear EndNote Site Licensee:

Thompson ResearchSoft is please to welcome you and your users to our newest product, *EndNote Web*. Your institution's *EndNote Web* subscription will begin in December 2006, and runs concurrently with your *EndNote* site licence. *EndNote Web* delivers an easy-to-use Web based bibliographic solution that complements *EndNote*, as well as providing tight integration with *ISI Web of Knowledge*. Your users can even start their papers in *EndNote Web* and finish them on the desktop with *EndNote* and vice versa! To access *EndNote Web* once it is live in December, your users will go to www.myendnoteweb.com. They will also be able to access it through *ISI Web of Knowledge* personalization.

Along with the introduction of *EndNote Web*, we are relaesing *EndNote X*, version X.0.2 for Windows and Macintosh. Your users will need to install this version to be able to take advantage of the new transfer feature to and from *EndNote Web*.

What is EndNote Web?

EndNote Web is a Web-based bibliographic service for students and researchers that organises personal reference collections and saves time retyping references for course work and publication. *EndNote Web* searches *ISI Web of Knowledge*, *PubMed* and hundreds of online library catalogs and imports references, complete with abstracts. With *EndNote Web* you can:

- Search *ISI Web of Knowledge*, *PubMed* and hundreds of library OPACS directly
- Import references from hundreds of online bibliographic databases and organise a library of references in any language with Unicode
- Store up to 10,000 references per *EndNote Web* account
- Edit references-add notes, keywords-modify any field
- use over 2,300 publishing styles to format in-text citations and bibliographies
- *Cite While You Write* in Microsoft Word (requires plug-in) to insert references and format papers instantly
- Format papers in other word processors using RTF (rich text format) files
- Easily transfer references to and from *EndNote X* (export/import to previous versions)
- Simplify collaboration with colleagues-share *EndNote Web* folders
- Use *EndNote Web* toolbars in Microsoft Internet Explorer and Mozilla to access your reference library in one click, and capture citation data easily (requires plug-in)

How will students and researchers learn to use EndNote Web?

EndNote Web's intuitive interface gets users up to speed quickly. An online *Getting Started Guide* comes with the program, including online tutorials with 24/7 access to assist users getting started. For more information go to www.endnoteweb.com/training or view the *EndNote Web* Guided Tour in the Help Section.

How will EndNote users take advantage of EndNote Web?

Desktop *EndNote* users will find *EndNote Web* a great way to collaborate, maximizing the expertise each researcher brings to a project. Using *EndNote Web*, researchers can share specific folders with designated colleagues or students. A shared folder can be viewed by others with an *EndNote Web* account. *EndNote* on the desktop remains a powerhouse favoured by researchers who publish frequently, write citation-intensive works and require performance available only from a desktop tool.

The addition of *EndNote Web* helps undergraduate students organise their references for citing in papers. *EndNote Web* users can select *Endnote X* or *EndNote Web*, for citing references in a paper. *Cite While You Write* works the same whether you are citing references from your desktop or Web library.

For the professional researcher and graduate student who depend on *EndNote* and other desktop writing tools, *EndNote Web* is the perfect complement for storing references. Now millions of *EndNote* users who demand a robust desktop writing tool with a higher degree of accessibility and control can be even more productive using the combination of *EndNote X* and *EndNote Web*.

What are the differences between EndNote and EndNote Web?

Compare features	EndNote Web	EndNote
Save references	+	+
Organise and edit references	+	+
Storage capacity	10,000	unlimited
Import from many databases and OPACS	+	+
Cite and format papers with bibliographies	+	+
Create and save advanced searches		+
Customise views and displays		+
Edit reference import filters & output styles		+
Use term lists for auto-entry		+
Cite tables, figures and equations		+
Drag and drop PDF files to store with references		+
Use EndNote export to transfer references from a variety of web based resources		+
Work offline (anytime/anywhere)		+
Local personal files and documents		+
High performance desktop environment		+
