Pathways to Flinders

At Flinders we recognise that every prospective student is an individual and that what works for one might not be right for another. That’s why we provide multiple entry pathways to help you get into Uni.

Take the time to explore your options and find the entry path that’s right for you. If you want more information or to check out your options go to: flinders.edu.au/pathways

Entry options

Competitive ATAR entry
The majority of Year 12 applicants enter university via the traditional competitive entry method, where offers are made to eligible applicants with the highest ATARs until all places in the course are filled. The 2011 ATAR cut-offs for each course provide a guide for 2012 entry and are listed in the course entries on the following pages.

Guaranteed entry ATAR
Achieve an ATAR equal to or above the published guaranteed entry ATAR and you will be guaranteed a place at Flinders. All you need to do is ensure you have listed Flinders courses first in your preferences and you will be offered a place in the highest Flinders course preference that you are eligible for in 2012.

More information can be found at: www.flinders.edu.au/guaranteedatar

Bonus points
Bonus points contribute to your ATAR when applying for Flinders University courses. Flinders offers a variety of bonus point access schemes, including: Student Equal Access Scheme (SEAS), Rural and Isolated Student Access Scheme (RISAS), Science and Maths Bonus Points Scheme, and the Languages Other Than English (LOTE) Bonus Points Scheme. Find out more at: www.flinders.edu.au/bonuspoints

How to apply

Flinders offers two admission cycles each year:
> **February** intake (Semester 1): applications open in August for commencement the following year.
> **Mid-year** intake (Semester 2): applications open in May for commencement in **July** that year. Not all courses are offered mid-year.

Applicants must apply through the South Australian Tertiary Admissions Centre (SATAC). For full details on how to apply visit www.satac.edu.au

This course...

- was the first specialised midwifery degree in Australia;
- will prepare you to work as a responsible and accountable professional midwife in a range of settings;
- stresses the partnership between midwife and mother at all times.

Course length: **3 years full-time only.**

Prerequisites: **None. No assumed knowledge.**

SATAC Code: Bachelor of Midwifery (Pre-Registration) – **214431.**

2011 ATAR: Bachelor of Midwifery (Pre-Registration) – **93.05.**

Guaranteed entry ATAR: Bachelor of Midwifery (Pre-Registration) – **95.00.**

Bonus points: **SEAS, RISAS.**

Course lengths and Gradstart Codes for Registered Nurse Entry and Registered Midwife Entry can be found on the following pages.

What does Midwifery at Flinders offer?

Midwifery encompasses the autonomous and collaborative care of women, families and the community. Midwives are accountable and responsible professionals who provide support, care and advice to women before, during and after childbirth. The role is challenging, varied and highly specialised.

The Bachelor of Midwifery produces graduates who:

- work in partnership with women to give the necessary support, care and advice during pregnancy, labour and the postpartum period and provide care for the newborn and the mother;
- are reflective about practice and have well-developed clinical reasoning skills;
- understand how social, environmental and economic factors impact on midwifery practice;
- reach the competency levels set by the Australian Nursing and Midwifery Council’s National Competency Standards for the Midwife.

The program of study reflects the philosophy that midwifery is a profession in its own right. It provides learning opportunities that will prepare you to function as a safe and competent women-centred midwife who is adaptable to different models of care and context of practice and who will be able to respond to changing health care needs and consumer demands.

Our graduates are eligible to apply for registration with the Nursing and Midwifery Board of Australia to practise in the role of a Registered Midwife.

Flinders University’s School of Nursing and Midwifery was the first to offer a Bachelor of Midwifery program in Australia in 1997 and has been at the forefront of midwifery innovation and development in Australia ever since.

We have a strong commitment to excellence in midwifery education, research and practice and work to develop strong links with the midwifery profession in metropolitan and rural areas of Australia.

We offer innovative practice-based education and aim to connect research, practice and teaching so that each informs the other. Our academic staff work closely with external clinical and community agency partners to create a curriculum and student practice that are informed by primary health care principles and demonstrate the highest levels of professionalism.
Study program
The course offers a number of pathways catering for students with varying levels of experience and backgrounds. The program is highly structured and combines clinical practice with topics such as the biophysical and psychosocial sciences, maternal and infant assessment and an evidence-based approach to midwifery practice.

Pre-Registration
The Bachelor of Midwifery (Pre-Registration) is a pathway for candidates with no previous formal midwifery qualifications or for enrolled nurses who would like to become eligible to register with the Nursing and Midwifery Board of Australia as a Registered Midwife.

In each year of the program, you will have the opportunity to follow identified women through their experience of pregnancy and childbirth in a variety of settings, including rural and remote areas.

First Year provides an introduction to clinical practice together with the scientific basis of midwifery and research skills, communication and maternal and infant assessment. You will also study the sociology of midwifery and the role of the midwife.

In Second Year you will continue to develop midwifery skills and focus on family dynamics, nutrition, pharmacology and the complexities of childbirth.

In Third Year you will explore managing practice and working in communities, and draw on the knowledge gained in the previous years to demonstrate your ability to work in the role of a Registered Midwife. There will be a focus on Indigenous health issues, midwifery research and practicum.

Registered Nurse Entry
Course length: 1.5 years full-time or equivalent part-time.
Gradstart Code: 2BP001.

The Bachelor of Midwifery (Registered Nurse Entry) is a pathway for candidates who are graduates of a nursing degree and/or hold a current practising certificate as a Registered Nurse who would like to become eligible to register with the Nursing and Midwifery Board of Australia as a Registered Midwife.

This pathway aims to build on knowledge and skills gained from previous tertiary qualifications/skills in nursing and to develop these into a midwifery practice context to prepare students to practice in the role of a Registered Midwife.

Registered Midwife Entry
Course length: 1 year full-time or equivalent part-time.
Gradstart Code: 2BP005.

The Bachelor of Midwifery (Registered Midwife Entry) is a pathway for candidates who are already eligible for registration as a Registered Midwife with the Nursing and Midwifery Board of Australia and hold a current practising certificate who would like to upgrade their qualifications to a midwifery degree.

Clinical placements
Clinical placement is undertaken in the Pre-Registration and the Registered Nurse Entry pathways.

These clinical placements are in agencies and hospitals in Adelaide and may include shift work. The full-time workload is about 40 hours per week, including classes, private study, assignment preparation and follow-through experiences. This may be spread over the whole year to ensure opportunities for continuity of care and relevant experience.

When undertaking topics that require a clinical placement you must meet the following requirements of the School of Nursing and Midwifery to demonstrate fitness for practice:
> When you register as a student, you must make a self-declaration to the Nursing and Midwifery Board of Australia as to your fitness to practise.
> Where there is a pre-existing illness or disability such that your ability to practise is impaired, you will advise the Topic Coordinator so that where possible a modified placement that will still meet the objectives of the topic can be arranged in consultation with you.
> You are also required to provide an up-to-date immunisation record before undertaking clinical placement.
Student registration and professional recognition

Under the terms of Health Practitioner Regulation National Law (South Australia) Act 2010, as a nursing and midwifery student enrolled in a course that provides a qualification for registration you are required (as a condition of your enrolment at the University) to register as a student with the Nursing and Midwifery Board of South Australia for the duration of your nursing studies.

Graduates are eligible to apply for registration with the Nursing and Midwifery Board of Australia as a Registered Nurse.

For more information on registration go to: www.nursingmidwiferyboard.gov.au

Career opportunities

Midwives have an extensive range of career opportunities in hospitals and in the community.

Hospitals offer a number of career options and provide an opportunity to work in different settings across Australia and overseas.

Community-based options include: work in community services, community health centres, youth and women’s shelters or teaching in higher education.

Further career opportunities for midwives include: self-employment, home-based services, health agencies, doctors’ surgeries, remote and rural areas, nursing agencies, international aid agencies and the Royal Flying Doctor Service.

Further study >>>

Honours, Graduate Certificate in Midwifery, Graduate Diploma in Midwifery, Master of Midwifery and Master of Nursing (Nurse Practitioner).

“Clinical placements throughout the course were very beneficial for skill building.”

“The variety of guest speakers with different backgrounds in midwifery gave me a greater understanding of the different possibilities this course can lead to.”

Flinders Midwifery graduate comments obtained from the Australian Graduate Survey.
Nursing

This course...

> will prepare you for a career that is challenging, rewarding and very much in demand;
> is the only course in South Australia offering a primary clinical placement model of Dedicated Education Units (DEUs) within the metropolitan area;
> offers opportunities for clinical placements in rural and remote areas, as well as internationally through a number of exchange opportunities with the School’s international partner institutions;
> aims to connect research, practice and teaching so that each informs the other.

Course length: 3 years full-time or equivalent part-time.

Prerequisites: None. No assumed knowledge.

SATAC Code: Bachelor of Nursing (Pre-Registration) – 214311.
Riverland – 214312.
2011 ATAR: Bachelor of Nursing (Pre-Registration) – 65.10. Riverland – 71.75.
Guaranteed entry ATAR: Bachelor of Nursing (Pre-Registration) – 75.00. Riverland – 70.00.

Bonus points: SEAS, RISAS.

Course lengths and Gradstart Codes for Graduate Entry, Registered Nurse Entry, Re-Entry and Registered Midwife Entry can be found on the following pages.

What does Nursing at Flinders offer?

Nursing encompasses autonomous and collaborative care of individuals of all ages, families, groups and communities, sick or well and in all settings. Modern nurses play an important role in health promotion, maintenance and education, as well as in traditional patient care and the restoration of health.

The Nursing program at Flinders produces graduates who can function in a variety of clinical settings and roles, have well-developed clinical reasoning skills, and understand that professional practice demands life-long learning. You will be taught how social, environmental and economic factors affect health; to access, evaluate and communicate information; and to negotiate with people from a variety of backgrounds and understand cultural differences and their relationship to health. The course is designed to help you reach the competency levels set by the Australian Nursing and Midwifery Council to practice in the role of a Registered Nurse.

Emphasis is placed on preparing you to manage rapid technological and social change and respond to ethical and legal demands. Our aim is to prepare nurses who are reflective about practice and have well-developed clinical reasoning skills.

Our graduates are eligible to apply for registration with the Nursing and Midwifery Board of Australia as a Registered Nurse.

Flinders University's School of Nursing and Midwifery has been at the forefront of innovation and development in Australia for many years and is internationally recognised for its high quality programs in nursing and midwifery education. These programs address health issues and midwifery and nursing care practice across the lifespan in home, community and institutional settings.

Our staff come from diverse backgrounds, and have many years of experience in a range of clinical specialties, sciences, humanities and law. Six have won Vice-Chancellor’s Excellence in Teaching Award, whilst others have won national awards.

We work closely with external clinical and community agency partners to create a curriculum and student practice informed by primary health care principles and demonstrate the highest levels of professionalism.

We are particularly proud of our student-friendly, accessible and inclusive environment that celebrates the academic achievements of both students and staff and facilitates a timely response to individual student issues and concerns.
Graduate Entry

Course length: **2 years full-time** or equivalent part-time in internal mode only.

Gradstart Code: **2BG007**.

Pre-Registration

The Bachelor of Nursing (Pre-Registration) is a pathway for students with no previous formal nursing qualifications, for enrolled nurses and/or for psychiatric/mental health/mental deficiency nurses who would like to become eligible to register with the Nursing and Midwifery Board of Australia as a Registered Nurse. It requires three years of full-time study or the equivalent part-time in the internal mode only. This pathway is also offered at our Riverland Campus.

First Year aims to introduce you to clinical practice together with the scientific basis of nursing with communication, research skills and the role of the nurse in the health care system.

During Second Year you will continue to develop nursing skills and relate all aspects of body function with nursing practice, and continue gaining clinical experience in various health care settings.

In Third Year you will explore more complex health issues – including topics such as Indigenous Health Issues for Nurses and Midwives and Nursing in a Socio-political Context – and draw on the knowledge gained in the previous years to demonstrate your ability to work in the role of a Registered Nurse.

Registered Nurse Entry

Course length: **1 year full-time** or equivalent part-time in internal mode only. **Mid-year entry only.**

Gradstart Code: **2BP002**.

The Bachelor of Nursing (Registered Nurse Entry) is a pathway for candidates who are qualified and registered/licensed nurses overseas who would like to become eligible to register with the Nursing and Midwifery Board of Australia as a Registered Nurse.

The year of study aims to build on and develop the nursing skills of overseas trained and qualified nurses and prepare them to join the Australian workforce in the role of a Registered Nurse.

Studies include nursing research skills, the scientific basis of nursing, health psychology and health sociology, professional nursing studies and clinical experience in various health care settings.
Nursing continued

Re-Entry

The Bachelor of Nursing (Re-Entry) is a pathway for candidates with prior Australian nursing registration who are no longer eligible to hold a current practising certificate and must complete a re-entry course to rejoin the nursing workforce as a Registered Nurse.

The year of study aims to renew and develop the nursing skills of previously registered nurses and to prepare them to rejoin the nursing workforce. Studies include nursing and research skills, the scientific basis of nursing, health psychology and health sociology and clinical experience in various health care settings.

Registered Midwife Entry

The Bachelor of Nursing (Registered Midwife Entry) is a pathway for candidates who are graduates of a midwifery degree and/or hold a current practising certificate as a registered midwife who would like to become eligible to register with the Nursing and Midwifery Board of Australia as a Registered Nurse.

The pathway aims to build on knowledge and skills gained from previous tertiary qualifications in midwifery and to develop these into a nursing practice context to prepare you to practise in the role of a Registered Nurse.

Clinical placement

Clinical placement is undertaken in all of the above pathways in agencies and hospitals in Adelaide and involves shift work. The full-time workload is approximately 35 hours per week spread across 13 weeks of the semester. This includes time spent attending classes on campus, private study, assignment research and writing and exam preparation.

When undertaking topics that require a clinical placement you must meet the following requirements of the School of Nursing and Midwifery to demonstrate fitness for practice:

> When you register as a student, you must make a self-declaration to the Nursing and Midwifery Board of Australia as to your fitness to practise.

> Where there is a pre-existing illness or disability such that your ability to practise is impaired, you will advise the Topic Coordinator so that where possible a modified placement that will still meet the objectives of the topic can be arranged in consultation with you.

> You are also required to provide an up-to-date immunisation record before undertaking clinical placement.

Student registration and professional recognition

Under the terms of Health Practitioner Regulation National Law (South Australia) Act 2010, as a nursing and midwifery student enrolled in a course that provides a qualification for registration you are required (as a condition of your enrolment at the University) to register as a student with the Nursing and Midwifery Board of South Australia for the duration of your nursing studies.

Graduates are eligible to apply for registration with the Nursing and Midwifery Board of Australia as a Registered Nurse.

For more information on registration go to: www.nursingmidwiferyboard.gov.au

Riverland campus

The Riverland campus of Flinders University is located within the rural township of Renmark, nestled within one of South Australia’s richest horticultural regions – The Riverland.

The Riverland offers the Bachelor of Nursing with a distinct rural focus. Studying in the Riverland provides you with many opportunities for professional and personal development. Personally, it provides the chance to experience a different life-style, to meet new people and to move beyond comfort zones. Professionally, the diversity and variety inherent in rural practice fosters the development of high levels of professional competence, independence, resourcefulness and flexibility.

Applicants interested in studying the Bachelor of Nursing in the Riverland must apply with SATAC Code 214312.
Combined degrees
You can combine the Bachelor of Nursing (Pre-Registration) with the Bachelor of Health Sciences:

Bachelor of Health Sciences/
Bachelor of Nursing
(Pre-Registration)
4 years | SATAC Code: 214182
You will meet the requirements to become eligible for nursing registration and complete a Bachelor of Health Sciences with a specialty stream in Health Education and Promotion, Health Management, Disability and Community Rehabilitation, or Mental Health Nursing.

Career opportunities
Nurses have career opportunities in hospitals and the community in roles such as aged care or geriatric nurses, emergency nurses, critical care nurses, neonatal intensive care nurses, maternal and child health nurses, paediatric nurses, perioperative nurses, oncology nurses, palliative care nurses, mental health nurses, remote area nurses, occupational health nurses, research nurses and general practice nurses.
Hospitals, whether private or public, offer a number of career options and provide an opportunity to work in different settings in cities across Australia, regional areas and overseas. Hospitals also provide nurses with the opportunity to specialise in particular clinical areas of interest. Areas outside of hospital wards also offer nurses career opportunities in radiology, pathology, theatres, management, education, research and clinics.
The community offers a number of career options and provides an opportunity to work in community health services, district nursing, primary care, schools or teaching in higher education.

Further study >>>
Flinders University offers a number of study options to nursing graduates including Honours, Graduate Certificate in Nursing, Graduate Diploma in Nursing, Graduate Diploma in Mental Health Nursing, Master of Nursing, Master of Mental Health Nursing, and Master of Nursing (Nurse Practitioner).

“The lecturers were very encouraging, enthusiastic, motivated and fantastic to learn from.”
“The clinical placements were very useful as they allowed you to practise and improve your clinical skills in a hands-on environment with real patients.”
Flinders Nursing graduate comments obtained from the Australian Graduate Survey.
You may also be interested in...

**Arts**
3 years full-time or equivalent part-time.
4 years with Honours.
Prerequisites: None. No assumed knowledge.
SATAC Code: 214031
The Bachelor of Arts (BA) enables you to explore a single field of study in depth or study several different fields through a wide range of majors and minors. The BA produces flexible, literate, independent and well-informed graduates, equipped with transferable, highly valued skills.
The following areas of study may be relevant to students interested in Nursing and Midwifery and can be taken in the BA as a major or minor:
- Biological Sciences
- Environmental Studies
- Psychology
- Women’s Studies
More information about these courses can be found in the Flinders Arts & Humanities undergraduate programs brochure.

**Biotechnology**
3 years full-time or equivalent part-time.
4 years with Honours.
Prerequisites: None. No assumed knowledge.
SATAC Code: 224141 | 224231 (Honours)
The Biotechnology specialisation, available in the Bachelor of Science and Bachelor of Science (Honours), is recognised as a leading biotechnology degree in Australia. Biotechnology is the use of living organisms for health, social or economic purposes.
This course has a strong business component with emphasis on enterprise management, intellectual property protection, marketing, and the legal, ethical and social aspects of biotechnology.
More information about this course can be found in the Flinders Science undergraduate programs brochure.

**Disability and Developmental Education**
4 years full-time or equivalent part-time.
Option for Honours in Fourth Year.
Prerequisites: None. No assumed knowledge.
SATAC Code: 224531 | 224535 (external)
The Bachelor of Disability and Developmental Education will help you develop specialist human service skills in areas including counselling, rehabilitation, case management, skill development and individual support.
The course will prepare you for a rewarding career that enables you to make an important difference in people’s lives.
This course is also offered externally.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

**Engineering (Biomedical)**
Prerequisites: SACE Stage 2 Mathematical Studies or Mathematical Methods. Knowledge of SACE Stage 2 Physics is assumed.
Engineering (Biomedical)
4 years full-time or equivalent part-time.
SATAC Code: 214771
Engineering (Biomedical)/MEng (Biomedical)
5 years full-time or equivalent part-time.
SATAC Code: 214881
The Bachelor of Engineering (Biomedical) involves using electronics and computer systems to improve health care and health services to enhance the quality of human life. You will gain a solid education in engineering and medical science and develop skills to investigate, plan, design, manufacture and maintain systems and equipment used in all aspects of health care. All students undertake Flinders University’s nationally recognised 20-week industry placement.
Masters allows you to undertake more specialist study, particularly in the medical topics and graduates will be awarded a Bachelor of Engineering (Biomedical) and a Master of Engineering (Biomedical).
More information about these courses can be found in the Flinders Engineering undergraduate programs brochure.

**Environmental Health**
4 years full-time or equivalent part-time.
Prerequisites: None. No assumed knowledge.
SATAC Code: 214871
The Bachelor of Health Sciences/Graduate Diploma in Environmental Health Practice prepares you for a career in environmental health which can include monitoring and maintaining health standards in relation to air, food and water quality, soil pollution, waste management, noise pollution, pest control, housing and the use of hazardous substances.
Graduates of this pathway will be awarded a Bachelor of Health Sciences and a Graduate Diploma in Environmental Health Practice.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

**Health Sciences**
3 years full-time or equivalent part-time.
4 years with Honours.
Prerequisites: None. No assumed knowledge.
SATAC Code: 214181 | 214182 (combined degrees)
The Bachelor of Health Sciences combines health-related topics with specialised studies. It caters for a wide range of careers and equips you with transferable, industry relevant skills. The course is multidisciplinary and there are multiple majors available. You can study: disability, health education and promotion, health management, the life sciences, and nutrition.
The course gives you a deeper understanding of the roles and functions of various health professions and provides internship opportunities with industry placements in a variety of areas.
More information about this course can be found in the Flinders Health undergraduate programs brochure.
Medical Science
3 years full-time or equivalent part-time.
4 years with Honours.
Prerequisites: None. No assumed knowledge.
SATAC Code: 214421
The Bachelor of Medical Science offers a specialised program for those seeking work as medical science professionals in areas such as biochemistry, biotechnology, chemistry, microbiology, molecular biology, neuroscience, nutrition, pharmacology, physiology, and toxicology.
The course offers a basis for postgraduate studies in radiology, pathology, pharmacology and other fields. It is also a preparation for the graduate-entry medical and health programs at Flinders.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Nutrition and Dietetics
4 years full-time only.
Prerequisites: None. No assumed knowledge.
SATAC Code: 214381
The Bachelor of Nutrition and Dietetics is designed to produce nutritionists and dietitians who interpret scientific knowledge about food then translate it into practical information to help people change their eating habits and improve their health.
You will gain knowledge about the nature, management and prevention of diet-related diseases and the social and psychological factors that influence what people eat.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Optometry
5 years full-time only.
Prerequisites: None. Knowledge of Stage 2 Chemistry and Physics is assumed. Applicants must complete the UMAT.
SATAC Code: 214931
The Bachelor of Medical Science (Vision Science)/Master of Optometry gives you a fundamental grounding in science with a specialisation in Vision Sciences, where you will study the visual system and factors that influence sight in preparation for intensive study and clinical experience in optometry. This double degree prepares you with the knowledge and skills you will need to provide vital optometry services to the community, undertake vision research, and teach in optometry and vision science.
Flinders is recognised nationally for its research into blinding eye conditions.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Occupational Therapy
5 years full-time only.
Prerequisites: None. Knowledge of SACE Stage 2 Biology is assumed.
SATAC Code: 224071
The Bachelor of Health Sciences/Master of Occupational Therapy program provides you with the skills and knowledge to assess and treat people who have limited ability in daily activities because of illness, injury or circumstance.
You will develop skills in the therapeutic use of occupations, individual and group assessment, and in intervention techniques. Supervised clinical placements are integral to the course and will enable you to develop a sound basis for professional practice.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Paramedic Science
3 years full-time or equivalent part-time. Conversion pathway also available.
Prerequisites: None. No assumed knowledge.
SATAC Code: 224321
The Bachelor of Paramedic Science offers a direct-entry program for anyone seeking a career as a paramedic or communications officer/call-taker with ambulance services. A conversion course for people with existing paramedic qualifications is also available.
This course ensures that all graduating paramedics have the skills, knowledge and attitudes to enable them to provide sophisticated emergency prehospital care and ensure seamless care from site to hospital.
More information about this course can be found in the Flinders Health undergraduate programs brochure.
Physiotherapy
5 years full-time only.
Prerequisites: None. Knowledge of SACE Stage 2 Biology and Physics is assumed.
SATAC Code: 224081
The Bachelor of Health Sciences/Master of Physiotherapy program builds on Flinders University’s strengths in musculoskeletal medicine.
This program will provide you with the physiotherapy knowledge and skills required to become registered and work as a physiotherapist. Supervised clinical placements including rural and remote placements will enable you to develop a sound basis for professional practice.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Science
3 years full-time or equivalent part-time.
4 years with Honours.
Science and Science (Honours)
Prerequisites: None. No assumed knowledge.
SATAC Code: 214331 | 224191 (Honours)
Science (Honours) – Enhanced Program for High Achievers
Prerequisites: At least 3 of the following SACE Stage 2 subjects or equivalent: Biology, Mathematical Studies, Specialist Mathematics, Chemistry, Physics, Geology.
SATAC Code: 214721
The Bachelor of Science enables you to follow your interests in a variety of study areas, or focus on a specialisation.
The Bachelor of Science (Honours) – Enhanced Program for High Achievers offers students of exceptional academic ability an enhanced program of studies.
The following areas of study may be relevant to students interested in Nursing and Midwifery and can be taken in the Bachelor of Science, Bachelor of Science (Honours) and Bachelor of Science (Honours) – Enhanced Program for High Achievers as an extended major, major or minor:
> Biological Science (minor only)
> Chemistry (extended major, major, minor)
> Microbiology (minor only)
> Molecular Biosciences (major only)
> Molecular Biosciences and Microbiology (extended major only)
More information about these courses can be found in the Flinders Science undergraduate programs brochure.

Speech Pathology
4 years full-time only. Honours available.
Prerequisites: None. No assumed knowledge
SATAC Code: 214352
The Bachelor of Speech Pathology involves facilitating communication skills by working with people or through research. Speech pathologists treat people affected by surgery, brain damage or disease of the nervous system and people with difficulties acquiring normal speech sounds or language.
Graduates are prepared for entry into other health professions such as audiology or medicine.
More information about this course can be found in the Flinders Health undergraduate programs brochure.

Why make Flinders your choice?

Before you get here
Helping you realise your goals and ambitions is important to us at Flinders University.
It is why we have so many flexible entry pathways.
And it is also why we have an extensive network of services to support you all the way from your initial enquiry and enrolment right through to your graduation.

Flinders understands that everybody’s life path is different.
If you are completing Year 12 and thinking about uni, Flinders improves your chance of getting into the course of your choice by offering bonus points for many of its courses.
If you are not a school leaver, TAFE/VET qualifications, the Special Tertiary Admissions Test, foundation studies programs and prior tertiary studies are other ways you can get to Flinders.

While you’re here
A well-rounded university education should not be the end of your learning but a launching pad for the next phase of your life.

What you learn should be relevant, it should increase your understanding of the world around you, and it should help you realise your full potential.

Flinders is fully committed to constantly improving the quality of its teaching and learning at Flinders is connected to our dynamic research environment, with strong links to industry and the broader community.

Among our staff there are a number of national and international award winners for teaching and research, and Flinders has a solid record of achievement in the Australian Awards for University Teaching.
Flinders also has state-of-the-art facilities on a superb campus – it is a perfect setting in which to study, to grow, to relax and to meet friends.

Your next step
Flinders has a variety of resources and services to help you kick-start your career.
Practical placements which give you job-ready skills are an integral part of many Flinders courses.

You will have access to valuable career advice from industry leaders, professionals and graduates.

Or you may like to study one of our postgraduate courses.

Whatever your next step, when you graduate from Flinders you will be part of an international network of alumni who have built careers that enrich their communities across Australia and throughout the world.
