EARLY INTERVENTION CLINIC
“Individual speech therapy for your child’s specific needs”

The Flinders University Early Intervention Clinic is a cost recovery clinic run by the Department of Speech Pathology & Audiology.

Our Clinic provides speech and language assessment and therapy services to children between 18 months and 6 years of age. Ongoing services are available for children under 6 years of age.

This clinic is run by an experienced Speech Pathology Clinical Educator who is employed by Flinders University. Speech Pathology students are directly supervised by the Speech Pathology Clinical Educator to provide individual programs to participating children. A written report is provided detailing assessment results and management recommendations.

Children participating in this clinic may receive weekly speech therapy directed by a Speech Pathology student and supervised by the Speech Pathology Clinical Educator, regardless of the severity of the child’s speech and language difficulties.

This provides all participating children the option of receiving intensive individual Speech Pathology services targeting their specific area of concern. However, in some circumstances, parents may feel that their child would benefit from less frequent therapy and this can be negotiated with the Speech Pathology Clinical Educator.

THE EARLY INTERVENTION CLINIC PROVIDES

- Individual Speech Pathology Assessment directed towards your child’s specific communication needs.
- Specific feedback regarding your child’s Speech Pathology Assessment results, focusing on areas of both strength and weakness.
- Joint goal setting between the parent and the student clinician to allow the parent to have a significant input into the communication program developed.
- Weekly individual therapy program based on your child’s Speech Pathology assessment results and identified goals.
- Written Speech Pathology assessment report and written report of progress at the end of each semester of therapy.
- Provision of a home program for each child to encourage and reinforce their progress for the duration of their therapy program.

SEMESTER DATES

The clinic runs on Wednesday and Thursday only
February - June & July - November
The clinic will generally not run during school holidays (apart from Summer Clinic).
