- Clients attending not on Centrelink Benefits
Applicants for Emergency Assistance by Country Birth
Presentations for Assistance by Sudanese Community 2004 - 2011
Household Composition

The chart shows the distribution of household compositions, with the highest number of households consisting of a single person over 18 years old. Other categories include couple with no dependents, couple with dependents, extended family group, group household, single parent, and single person under 18 years old. The category 'not known' has the least number of households.
For some, chronic issues may affect their ability to self manage on an ongoing basis.
Most of the people we see are doing the best they can with what they have.
Third tier lenders offer easy access to expensive money. Many of our clients become locked in to loans which charge extremely high rates of interest. Income is then spent paying high interest at the expense of basic needs.
3822 of the households presenting for emergency assistance in 2010 – 2011 had dependant children.
