

Short course

19 - 23 July 2017 (INCLUSIVE)

HEALTH INFORMATICS

Who should attend?

Clinicians, informaticians and managers working in the health sector, as well as IT professionals involved in developing and implementing systems related to health care delivery.

Course aims

This short course will enhance participants' understanding of current developments in health informatics and their potential impact on the delivery of local health care services; and to assist participants in developing a set of skills and competencies for making strategic and operational management decisions in relation to health informatics.

Successful completion

On completion of this course, participants should be able to:

- understand the essential elements of health informatics in terms of: data, information, knowledge, and decisions,
- explain the processes of sourcing, accessing and storing electronic data; aggregating, linking and benchmarking information; visualising information to construct meaning; and the behaviour, values and engagement required in making informed healthcare decisions,
- apply the elements of health informatics in addressing a health issue/problem, considering the clinical, administrative and technical implications involving healthcare practitioners and processes,
- predict the clinical, administrative and technical implications involving healthcare practitioners and processes, when applying health informatics, and;
- evaluate the effectiveness of resolving an identified health issue/problem using health informatics.

Presenter

This short course will be facilitated by **Mark Brommeyer** *MEdAdmin, GradDipEd, BAppSc, RN, FACHI, AFAIM, MAICD, CHIA.*

Mark has a long career as a health professional and consultant and is actively involved in current developments in health informatics in Australia, and is on the CHIA Board (Certified Health Informatician Australasia).

He has also delivered highly successful workshops on Health Informatics and Quality and Safety in Health Care in the Flinders-Nankai Master of Hospital Administration program in China, Singapore and Australia.

Mark will be assisted by guest speakers with relevant and current industry experience.

“Brilliant approach to adult learning. Very knowledgeable with lots of real life, lived experiences which put things in very good and clear context.”

“Mark’s experience, knowledge and passion was evident. Teaching style was inclusive of all, and drew on all members of the group. Mark is a benefit to your school!”

Certificate of participation

A certificate of participation will be awarded to all participants who attend the course but who do not wish to complete the assessment tasks.

Certificate of completion

A certificate of completion will be awarded to participants who successfully complete the assessment requirements.

Please note: Credit will be granted towards Health Care Management awards at Flinders University for successful completion of this short course, including the assessable components. Current students can enrol in this topic as an elective in their course.

Registration details

Limited places are available so early registration is recommended.

Flinders University Students: Please enrol and pay online via the Student Information System. (The topic code is HACM9206). Please also complete and submit the registration form.

Non students: Please complete and return the registration form. We will email details on how to make payment once your registration is confirmed.

Cost includes course materials and refreshments will be provided each day.

CLOSING DATE FOR REGISTRATIONS:

Friday 7 July, 2017

COST: \$1,875 (GST inclusive)

Cancellation Policy

- No penalty applies if notice of cancellation is received before 7 July, 2017.
- 50% refund applies if notice of cancellation is received between 8 July - 14 July, 2017.
- No refund will be made if notice of cancellation is received after 15 July, 2017.
- All cancellations must be in writing.
