Watch out for common eye hazards!

- flying particles from grinding, sawing, etching and other machine operations
- sparks from welding and other operations
- fumes and splashes from molten materials and chemicals
- harmful light rays from arc and electrical welding, furnace operations and acetylene torches

Use the right eye protection for your job...

- Australian Standards approved
- properly fitted
- in good repair

Eye Safety Checklist

- Be alert to eye hazards at your worksite.
- Follow established safety guidelines.
- Learn first aid for eye injuries.
- Know where all eyewash stations and emergency equipment are.
- Get prompt medical attention for any eye injury.
- Ask your supervisor if it's safe to wear contact lenses in your work area.

Never depend on regular glasses or contact lenses to protect you.
