“Flinders University’s investment in the redevelopment of Tonsley is an investment in the future of South Australia where collaboration, innovation and entrepreneurship are at the heart of our activities.

Our focus is on the delivery of high impact solutions to real-world problems that will improve lives and build businesses in our community.”

– Vice-Chancellor Professor Colin Stirling.
The University’s vision for Flinders at Tonsley is now realised with a new state-of-the-art $120 million teaching and research facility.

The six-storey, 16,000 square metre flagship building is a focus for the University’s teaching of computer science, engineering and mathematics and related research and entrepreneurship.

Designed by award-winning international architects HASSELL, Flinders at Tonsley centrally locates the University’s School of Computer Science, Engineering and Mathematics, New Venture Institute, Flinders Partners, Medical Device Research Institute, and Centre for Nanoscale Science and Technology alongside some of Adelaide’s biggest businesses and industries, including South Australian-owned technology and communications company Hills.
Flinders at Tonsley is the heart of South Australia’s new industrial future.

It embodies world’s best practice in education, teaching and research.

It’s a place where innovation, collaboration and entrepreneurial spirit combine to create the products and processes of the 21st Century – and beyond.

With more than 150 staff and 2,000 students – and a 2,000 square metre pod for heavy engineering equipment – this new precinct is a place where Flinders University students interact with business and where business interacts with Flinders’ researchers in areas such as engineering, medical devices and nanoscale technologies.

Tonsley is located centrally between Flinders University’s Bedford Park campus and Adelaide city. It is connected to the city by a train-line, offering convenient access 15 minutes from the city’s CBD.

It is a 5-minute car ride, a 15-minute ride on the Flinders loop bus, or a 30-minute walk from the Bedford Park campus.
