CULTURAL TOURISM & ECOTOURISM

WHY STUDY CULTURAL TOURISM/ECOTOURISM AT FLINDERS?

Tourism is the largest and fastest growing global industry. The program has a wide perspective with excellent global employment opportunities. Flinders offers you small class sizes and the flexibility to tailor the course to your interests and job aspirations.

The Cultural Tourism program combines academic analysis of trends in worldwide tourism and practical contact with selected Australian aspects of tourism.

Ecotourism at Flinders University is firmly based in the Science Faculty because the natural sciences are the basis of effective ecotourism.

This program has been designed in consultation with the tourism industry and relevant Australian government agencies to produce graduates suited for careers as future operators, guides, planners, and consultants in the global nature-based tourism industry.

The program of study combines a science, tourism and business focus.

The approach at Flinders University is in marked contrast to other ecotourism programs, most of which originate in Business or Tourism and Hospitality institutions, and are consequently unable to offer adequate training in the natural sciences.

Flinders is an excellent base for Ecotourism studies because there are a wide variety of habitats in easy reach of the campus. You will gain experience in a broad range of ecosystems such as marine and freshwater, arid-lands and forests.

Volunteering opportunities may be negotiable for individual students.

UNITS

SEMESTER 1 ONLY (MARCH TO JULY)

4.5  AMST1001 - AMERICAN POPULAR CULTURE
