Travel past the main entrance of the Flinders Medical Centre (Flinders Drive) and take the first left onto Medical Sciences Road. Medical Sciences Road is a dead-end street which stops at the Level 4E entrance of the hospital.

*Parking here is for ‘Child Care’, ‘Disabled’ or ‘Blue’ permit Holders ONLY. There are only 3 Blue permit parking spaces at this entrance, so parking cannot be guaranteed at any time, even if you have a Blue permit. Blue parking spaces cannot be reserved, so this entrance is better suited to visitors being dropped off. Visitors who require parking should refer to the instructions on “How to get to the Anatomy & Histology Office from Flinders University Carpark 1”.

Upon entering through the glass doors of the level 4E entrance, you will immediately see a set of bathrooms in front of you, and a corridor on either side of these. To get to level 6, take the corridor to your left.
Upon turning the corner into the corridor you will immediately see a set of lifts. Take either of these lifts up two floors to **Level 6**.

NB. The ‘Up’ button for these lifts can be temperamental, so keep pushing it until it illuminates.

---

Upon exiting the lifts at level 6, **turn right** down the ‘E’ Corridor.

---

Follow this corridor (for approx. 20 metres) until you see the overhead sign indicating the Anatomy & Histology Dept.

---

To the right of this sign is **room 6E121**, otherwise known as the **Anatomy & Histology Office**.
