

# ODD ONE OUT

*Circle the different Wombat*

## Giant wombat

(*Phascolonus Gigas*)

- Extinct cousin of our current wombat
  - Could weigh up to 200kgs!
- That's 500% heavier than wombats today

## Were-wombat

(*Thylacoleo carnifex*)

- Evolved blade-like back teeth
- Strongest bite of any mammal we know!
