* Flinders rating 89.7%, rounded up to 90%. Excellence in Research for Australia, 2018.

Partner with us in the *fearless* pursuit of knowledge.

Co-fund a Flinders PhD Enterprise Scholarship

By co-funding a Flinders PhD Enterprise Scholarship, you will:

- Connect with talented researchers
- Co-create a research project that matters to your organisation
- Drive lasting impact on your operations, products, or services
- Align research with industry needs through in-depth integration
- Empower and upskill your team
- Tap into the Flinders research community.

Students enrolled in the Flinders University PhD Enterprise Scholarship undertake a 3.5 year research project that addresses real-world challenges identified by the industry partner from within our six colleges:

- Business, Government & Law
- Education, Psychology & Social Work
- Humanities, Arts & Social Sciences
- Medicine & Public Health
- Nursing & Health Sciences
- Science & Engineering

The Scholarship also incorporates a 3-month internship, enabling exponential development and shared expertise for the student and your employees.

As a co-funded PhD, your organisation and Flinders will each cover 50% of the stipend costs of a PhD scholarship for up to 3.5 years. You can top up this amount to attract top talent in a competitive market.

Your organisation will also partner with us in co-supervising the PhD, enabling the internship and potentially providing access to data, information and equipment.

Typically, Project Intellectual Property (IP) will be owned by the Industry Partner subject to agreed terms with Flinders University.
