

A grassroots approach to education in providing palliative care for older people

Working with the aged care sector, palliAGED has developed valued and practical resources. Despite an abundance of opportunities for palliative care education, what is needed is a stepped entry into education that will build the workforce and improve the care of older people. The palliAGED resources guide aged care staff on a continuum from understanding key principles, to in-house training, and responding to complex care needs at the end of life.

palliAGED is the palliative care evidence and practice information resource for the Australian aged care sector. Using robust quality processes to ensure trustworthiness and relevance, it continuously evolves to meet the needs of the aged care workforce. Through partnerships with aged care services and representatives, palliAGED identifies and responds to sector needs.
