

RePaDD Higher Degree by Research

Make a difference when it matters most

At RePaDD, we are dedicated to improving care at the end of life. Our research addresses the physical, psychological, cultural and spiritual needs of diverse populations, ensuring comprehensive palliative care. As the demand for palliative care grows with an ageing population and complex disease management, our work becomes increasingly vital.

Why undertake a Higher Degree by Research (HDR) at RePaDD?

- **Expertise and resources:** RePaDD delivers several national palliative care projects and resources, including **CareSearch** and **palliAGED**, and draws on the expertise of nationally and internationally respected leaders to offer unique perspectives on life and death
- **Networking opportunities:** Establish lasting networks and collaborations that extend beyond your studies
- **Career advancement:** A HDR degree supports advancement pathways in clinical, academic, research or managerial roles in health, education, government, community organisations or advocacy
- **Skill development:** Gain knowledge in theory, research design, project management, communication and translation practices

Our research supervisors

Our diverse team of researchers brings extensive experience from various health and community settings, focusing on clinical and service delivery, communication, advance care planning, choice and advocacy, evidence analysis and translation.

Find a supervisor for your research journey at <https://researchnow.flinders.edu.au/en/persons>

You can contact our research supervisors directly to discuss your ideas or email repadd@flinders.edu.au

Embark on a journey to make a meaningful impact in palliative care with us. Your research can change lives.
