Across Australia, we have an expectation that our society will be fair, supportive, and inclusive. Sadly, this is often not the case. The social challenges facing individuals, groups, and communities are complex and wide-ranging. Nationally, we struggle with issues of child protection, domestic and family violence, housing and homelessness, the gap between Indigenous and non-Indigenous Australians, and many other social problems.

Flinders University is determined to make a difference. Consequently, the College of Education, Psychology and Social Work has established the Social Work Innovation Research Living Space (SWIRLS), bringing together a group of social work academics to create a leading national social work research centre. SWIRLS joins the Órama Institute, which focuses on multi-disciplinary research and discovery in mental health, wellbeing, and neuroscience.

SWIRLS aims to generate new knowledge and means to support the development of policy and practice across the fields of social work, mental health, and disability. In particular, SWIRLS is focused on transformative change and innovation around social work, research, practice, and policy. SWIRLS is a creative, dynamic, and collaborative centre that is driven by the latest evidence and innovative practices.

Our 'living lab' approach is co-designed with key stakeholders and led by academics with a deep field-based understanding of social issues. Reflecting our mission of changing lives and changing the world, our partnerships with government and community organisations are helping to develop innovative solutions for some of our most difficult social challenges - improving lives and creating safer, stronger, more stable societies.

Professor Michael Kyrios
Vice-President and Executive Dean
College of Education, Psychology and Social Work

Our game plan is to progress social work, policy, and research. We're doing things differently. In and around social work, we're engaging theory and evidence of lived-experience and create innovative solutions. Our research and practice is based on facts, not opinions. We take the spin out.
WE'RE DEVELOPING A FORMIDABLE REPUTATION FOR PRODUCING THEORETICALLY DRIVEN RESEARCH TO EXAMINE SOCIAL ISSUES AND SOCIAL WORK PRACTICE IN OUR EVER-EVOLVING WORLD.

Our research tackles many of the challenges that social workers face, including:

• Child protection
• Closing the gap between Indigenous and non-Indigenous Australians
• Disability
• Domestic and family violence
• Imprisonment
• Health and human services
• Housing and homelessness
• Quality of life

We deal with complex problems that need nuanced, evidence-based responses. In doing so, we embrace innovation, creativity, risk-taking, collaboration, and fresh perspectives. The evidence we produce—when put into action—will help social workers to work more effectively with our communities.

KEY FEATURES
Professor Sarah Wendt is a champion of listening. Whether she’s interviewing a survivor of domestic violence or leading her team of SWIRLS researchers, Sarah believes in the importance of listening to diverse voices. She values the experiences of people around her and is comfortable with being uncomfortable. She’s both a collaborator and a leader. She was rural-born and the first in her family to go to university. Domestic violence, child abuse and racism are just a few of the difficult social problems she tackles every day. It is her job and her passion.

Professor Lorna Hallahan is an expert in design. She’s savvy and skilled when it comes to designing research. That means she’s the first person to ask if you’re developing qualitative and mixed-methods evaluation and research, development of interview schedules, ethics requirements, recruitment protocols and data analysis.

Professor Lorna Hallahan is a complex thinker. She is a social worker, researcher and person with lived experience of disability. Lorna’s personal and professional experiences have been critically important in shaping her understanding of effective social work practice and social policy.

Professor Sarah Wendt is a master of policy. She is strategically placing people closer to change. She is a doer, a go-getter, a trailblazer. She is leading SWIRLS in a push for social change, development and cohesiveness.

Professor Lorna Hallahan is an advocate. She has been a social worker for over 35 years and an advocate for people with disability issues for over 25 years.

SWIRLS IS NOT A BUILDING. IT IS AN EVER-CHANGING SPACE DEFINED BY THE PEOPLE WHO CREATE IT.

WE TACKLE THE BIG ISSUES, AND WE ARE NOT AFRAID TO QUESTION THE STATUS QUO.

COLLABORATION AND OPEN INNOVATION ARE AT THE HEART OF WHAT WE DO.

KEY FEATURES
SWIRLS USES THE ‘LIVING LAB’ APPROACH. THIS MEANS WE BRING TOGETHER RESEARCHERS, PRACTITIONERS, POLICY PEOPLE AND PEOPLE WHO ENGAGE WITH SOCIAL WORK AND RELATED PROFESSIONS TO CO-DESIGN PROJECTS. It’s not your usual academia. We’re transgressing the lines drawn between us to bring a fresh perspective to complex problems and the solutions they need. This way, we know what’s happening ‘on the ground’. We know what social workers think will work, and what policies our governments might enact. We are adaptable and responsive. Our work is inter-disciplinary. Our research environment is informed by appreciative inquiries and participatory action research. We offer evidence that has the power to promote social justice values and shape our future workforce through knowledge, education, and professional development. Across it all, we design better prevention, intervention and services. We change policy and practice. We educate and empower and uplift vulnerable. We’re committed to making a meaningful difference in the lives of those we serve. We’re changing policy and practice. We’re changing the world.
CODESIGN IS A WAY OF LIVING, WORKING AND BEING IN THE WORLD. AT ITS HEART, IT IS THE SHARED GOAL OF MAKING THE WORLD A BETTER PLACE.

SWIRLS is formed around the goals of collaboration, partnerships, and open innovation to tackle complex social problems.

Our partnerships with industry, community groups, and government bring together applied research excellence, the practice wisdom and field-based knowledge of social workers, and the lived experiences and knowledge of individuals, families, groups, and communities.
