1. Governing Policy

Higher Degrees by Research Policy and HDR Examination Procedures

2. Scope

a. For the purposes of these rules, a thesis means a single substantial piece of written work, except that:
   i. if the research degree is in a creative, artistic or other discipline, a thesis means an artefact with a written exegesis, and
   ii. if the research degree is a PhD by Prior Published Work, a thesis means the prior published work with a contextual statement.

b. These rules cover all theses submitted for examination for the award of a higher degree by research.

3. Presentation requirements

a. Students are expected to keep their theses within the word limits specified below—excluding footnotes, bibliography, tables and appendices—bearing in mind that the quality, scale and scope of the research achieved is relevant to the discipline. Not adhering to word limits may be taken as evidence that the student is unable to demonstrate “the capacity to present well-written work” as required by the Course Rules.

b. Extensive footnotes or very large appendices may be counted within the word limit if their purpose appears to be to bypass the word limit.

c. All theses submitted in written format for examination for a higher degree by research must have a high standard of presentation. This is effected by:

i. Using a good word processing or desktop publishing computer package, and other software to ensure that presentation of text is both clear and attractive to the reader. Software training available at the [Support materials](#) website.

ii. Using the preferred font size of 11-12, with double or 1.5 spacing for the main text.

iii. Keeping margins moderate and in accordance with the professional standard appropriate to the discipline.

iv. Presenting tables, diagrams, figures and photographs in a manner acceptable to the discipline, either at the appropriate place in the text or, where lengthy or bulky, as an appendix.

4. **Research integrity requirements**

a. All HDR students must ensure their work submitted for examination is compliant with the University's [Research Integrity Policy](#) and the [Australian Code for the Responsible Conduct of Research](#).

b. Plagiarism is a form of research misconduct. HDR students are required to ensure that all written work, including previously published work, is put through the University’s electronic text-matching software, available through Flinders Learning Online, at each Milestone and as part of formal submission, as required by the [HDR Progression Procedures](#) and [HDR Examination Procedures](#), except in the following circumstances:

i. Where electronic text-matching is explicitly precluded by the terms of a Government or third party agreement which applies to the research, and an exemption application is approved by the Dean of Graduate Research. The work may be put through the text-matching software as a ‘Draft’ only.

ii. Where Australian Government Export Controls apply to the work, contact the Graduate Research Office before using text-matching software.

c. Ensuring the electronic text-matching reports are reviewed and signed off by the supervisor(s) in the Milestone reports and at thesis submission.

d. Ensuring that any material produced jointly by a student and their supervisors or others is included in the narrative of the thesis only if it is the original work of the student. The original work of joint authors other than the student must be fully acknowledged in exactly the same way that the work of any other authors is referenced (and see Section 7 on inclusion of published material).

e. Signing a declaration as per Section 5.a.iv.

5. **Content of thesis for submission**

a. All theses must include the following:

i. a title page with

   • the title of the thesis in full
- the full name and degrees of the student
- the name of the College most associated with the work, and
- the date when submitted for examination
  [Inclusion of the Flinders University crest, available from the Office of Graduate Research, is optional.]

ii. a table of contents

iii. a thesis summary of not more than 500 words

iv. a declaration signed by the student, as follows:
   "I certify that this thesis:
   1. does not incorporate without acknowledgment any material previously submitted for a degree or diploma in any university; and
   2. to the best of my knowledge and belief, does not contain any material previously published or written by another person except where due reference is made in the text."

v. an acknowledgment by the student of help given or work carried out by another person or organisation
  [Recipients of RTP support (fees offsets, stipends or allowances) must acknowledge the contribution of an “Australian Government Research Training Program Scholarship” in the thesis and in any publications that arise directly from the research undertaken during the candidature.]

vi. a list of all the student’s publications (both sole and co-authored) submitted, accepted and published during candidature

vii. the text (i.e., the substance of the student’s research and outcomes, or the contextual statement and published works, or the exegesis and creative artefact)

viii. a bibliography, and

ix. appendices, if any.

b. Other materials (e.g. digital media) may be included in the thesis, if approved by the University at the time of admission or at the Confirmation of Candidature Milestone.

6. Thesis with an artefact and written exegesis

a. A thesis in a creative, artistic or other discipline may take the form of an artefact with a written exegesis.

b. The exegesis must include:
   i. a conceptual framework
   ii. placement of the research within the current literature
   iii. placement of the artefact in contemporary or historical artistic or cultural literature
   iv. a discussion showing the overall significance of the work and contribution to knowledge, the reasons for choosing the mode of thesis, problems encountered and future directions of the work
   v. an appropriate bibliography.

c. Only artefacts commenced during candidature can be included in a degree with an artefact and written exegesis.

7. Inclusion of published material in thesis that follows a time-based supervised program of research and study

a. A student may publish their research during their candidature, provided it does not change the due date for submission of the thesis.

b. Except in the case of a PhD by prior published work, publications can only be included in a thesis if the publication commenced during candidature.
c. Publications or significant sections of publications (whether accepted, submitted or in manuscript form) arising out of work conducted during candidature may be included in the body of the thesis, or submitted as additional evidence as an appendix, on the following conditions:

i. they contribute to the overall theme of the work, are conceptually linked to the chapters before and after, and follow a logical sequence

ii. they are formatted in the same way as the other chapters (i.e. not presented as reprints unless as an appendix), whether included as separate chapters or integrated into chapters

iii. they are in the same typeface as the rest of the thesis (except for reprints included as an appendix)

iv. published and unpublished sections of a chapter are clearly differentiated with appropriate referencing or footnotes, and

v. unnecessary repetition in the general introduction and conclusion, and the introductions and conclusions of each published chapter, is avoided.

d. Multi-author papers may be included within a thesis, provided:

i. the student is the primary author

ii. there is a clear statement in prose for each publication at the front of each chapter, describing the percentage contribution of each author to the paper, from conceptualisation to realisation and documentation, in accordance with the Research Publication, Authorship and Peer Review Policy, and

iii. each of the other authors provides permission for use of their work to be included in the thesis on the Co-Authorship Approval Form.

e. Papers where the student is not the primary author may be included within a thesis if a clear justification for the paper’s inclusion is provided, including the circumstances relating to production of the paper and the student’s position in the list of authors. However, it is preferable to include such papers as appendices, rather than in the main body of the thesis.

8. Thesis for PhD by Prior Published Work

a. In addition to the relevant publications intended for examination, and all the matters listed in Rules 3. to 5. above, the thesis must include:

i. a contextual statement (but not a detailed reworking of individual papers) with:
   - the aims underpinning the publications
   - the field of knowledge within current literature
   - how the publications are linked, and
   - a conclusion showing the overall significance of the work and contribution to knowledge, problems encountered and future directions of the work

ii. a statement which indicates which portions of the published works are claimed to be original.

b. Multi-author publications may be included within a thesis, provided:

i. the student is the primary author

ii. there is a clear statement for each publication documenting the contribution of each author to the publication, from conceptualisation to realisation and documentation, in accordance with the Research Publication, Authorship and Peer Review Policy, and

iii. each of the other authors provides permission for use of their work to be included in the thesis on the Co-Authorship Approval Form.

c. Publications where the student is not the primary author may be included within a thesis if a clear justification for the publication’s inclusion is provided, including the circumstances relating to production of the publication and the student’s position in the list of authors. However, it is preferable to include such publications as appendices, rather than in the main body of the thesis.
9. Thesis in language other than English

a. Unless written into a Cotutelle Agreement, students enrolled in disciplines other than foreign language disciplines are not permitted to submit their theses in a language other than English.

b. In the case of students enrolled in foreign language disciplines, permission to submit a thesis in a language other than English may be approved as part of the Confirmation of Candidature Milestone, taking into account:
   i. the competence of the supervisors in the language proposed
   ii. the availability of a sufficient range of qualified examiners competent in the language, and
   iii. evidence of an appropriate link between the subject of the thesis and the language in which it is proposed to submit the thesis.

c. If submission of a thesis in a language other than English is approved, the thesis summary (Rule 5.a.iii.) must be in English.

10. Paid professional editing

a. Engagement of a paid, professional editor is permitted, on the following conditions:
   i. the editing is undertaken before the final version of the thesis is submitted to the student’s supervisor for consideration
   ii. editing is limited to formatting, grammar and style; does not alter or improve the substantive content or conceptual organisation of the thesis; and does not alter errors in primary sources, including graphs, tables, direct quotes and translation, though may draw attention to them
   iii. supervisors oversee the process and monitor professional editing to ensure the consistency of thesis quality, and
   iv. students include an acknowledgement of the help given or work carried out by another person or organisation in editing their thesis.

b. Note that:
   i. supervisors are not responsible for any changes made by an editor to a thesis, and
   ii. all professional thesis editing is considered to be a private arrangement between the student and a third party, and the University is not responsible for the payment or working conditions of editors engaged by students.

11. Uploading thesis

11.1. Submitting a thesis for examination

All HDR theses must be submitted for examination:
   a. in the format specified in these Rules, and
   b. by uploading the thesis in Inspire.

11.2. Uploading a thesis for award

a. Before a student’s award will be conferred, the student must:
   i. complete any required amendments, as per the HDR Examination Procedures
   ii. include on the thesis the date of award (in place of the date of submission) – the date of award is the date the student is notified that the thesis has been accepted for award, subject to any specified conditions
   iii. consider and apply for any restrictions on open access as per the HDR Examination Procedures, and
iv. upload the thesis, in its final format, on the University Library’s Digital Thesis Repository, in accordance with the process specified by the Library, including obtaining approval from the copyright owner for material in which the copyright is owned by a third party.

b. This uploaded thesis is the authoritative version of the thesis, and will be available in perpetuity for open access, unless restricted access is otherwise approved in accordance with the HDR Examination Procedures.

12. Printed copies of thesis

a. Students are not required to print or bind a copy of their thesis, except as required under the HDR Examination Procedures 4.3.b.

b. Nothing in these Rules prevents a student from printing or binding a final thesis for use and distribution as they see fit.
