# LEADERS IN HEALTH AND CARE

## STUDY HEALTH AT FLINDERS

With over 40 years' experience in nursing, midwifery, disability, speech pathology, nutrition and dietetics education, over 20 years' experience in audiology, palliative care and health sciences, and a breadth of courses that cover virtually every discipline in health and care, Flinders is a leader in health education.

### STUDY WITH LEADERS

Flinders University has a reputation for excellence in teaching, learning and research that spreads across the globe. Learn from the brightest minds in health research who will bring you the latest knowledge and skills, and prepare you for the future of health.

Flinders is ranked in the

## Top 2%

of universities in the world

THE World University Rankings 2020 as a percentage of the total number of universities in the world according to the International Association of Universities

## Study for success

Flinders programs are professionally accredited and globally recognised. We are the only university in South Australia with an on-campus teaching hospital, and we have many globally recognised health and medical research institutes and centres.

## No. 1 in SA

in Health Services & Support for median salary and learner engagement (postgraduate)

CHANGE IN THE LIVES OF OTHERS

# HEALTH

# Audiology

A professionally oriented course for graduates interested in acquiring knowledge and skills in the evaluation and management of auditory disorders including hearing loss and tinnitus and their consequences. This program prepares you to begin clinical practice as an audiologist in a range of urban, rural and remote settings. This enables you to become a well-informed health professional, and to acquire critical skills in appraising scientific and clinical information which will assist your further professional development.

There is a great demand for qualified and trained professionals in audiology, both within Australia and worldwide. The Flinders Master of Audiology course, which is the only course of its kind in South Australia, enjoys particularly high employment outcomes. Opportunities exist in city-based, rural and remote settings across the globe.

## Master of Audiology

2 IN

SATAC CODE

2CM039

### COURSEWORK ONLY

This course prepares you to begin clinical practice as an audiologist, a profession experiencing great demand both within Australia and worldwide.

Acquire knowledge and skills and build interest in the evaluation, management and consequences of auditory disorders such as hearing loss and tinnitus.

Learn to become a well-informed health professional who assesses scientific and clinical information to assist your further professional development.

The Master of Audiology is fully accredited by Audiology Australia.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

# Clinical Exercise Physiology

The Master of Clinical Exercise Physiology aims to prepare you for practice as an exercise physiologist. Graduates will be able to contribute to interdisciplinary health interventions using exercise as part of the management strategy of disease, dysfunction, and injury across a range of public and private settings and work within an interprofessional environment including rural and remote areas.

Exercise Physiologists prescribe and deliver exercise-based lifestyle and behaviour modification programs to prevent and treat injury and disease.

## Master of Clinical Exercise Physiology

2 IN

SATAC CODE

2CM224

The Master of Clinical Exercise Physiology is a 72-unit program of study designed for those with an Exercise Science qualification. You will undertake topics in interprofessional practice, chronic disease management and private practice, exercise management in priority conditions, advanced exercise prescription and musculoskeletal injury management, clinical exercise assessment and prescription and clinical placements.

This course also aims to equip graduates with the skills required to inform an evidence-based approach to research and practice.

# Clinical Rehabilitation

The postgraduate Clinical Rehabilitation program provides opportunities for health professionals from any allied health, medical or nursing field to enhance their knowledge, skills and attitudes in clinical rehabilitation.

Upskill your career in health and make a difference to those with musculoskeletal, neurological, cardiac, respiratory or cognitive conditions.

SATAC CODE 2CM136

### COURSEWORK ONLY

#### Graduate Certificate of Clinical Rehabilitation

The Graduate Certificate in Clinical Rehabilitation is an 18-unit program that enables you to undertake a general studies option to gaining an understanding of the principles and practice of clinical rehabilitation.

#### Master of Clinical Rehabilitation

The Master of Clinical Rehabilitation is a 72 unit program of study which is designed to provide you with flexibility while aiming to deepen and extend the knowledge and skills required for principles and practice of Clinical Rehabilitation in your field.

#### Master of Clinical Rehabilitation (Neurological Physiotherapy)

#### Master of Clinical Rehabilitation (Neurological Occupational Therapy)

These 54 unit Masters programs are designed for qualified OTs/physiotherapists to advance their neurological OT/PT skills.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

## Disability Studies

Become an effective and respected professional in disability and broaden your professional opportunities within an evolving policy and practice context. You will become NDIS aware and develop disability-specific knowledge to improve lives and realise potential.

### COURSEWORK ONLY

#### Graduate Certificate of Disability Studies

The Graduate Certificate is designed to meet the needs of practitioners working in disability, allied health and human services. It consists of 18 units and these can be completed on a part-time or full-time basis. Students complete one core topic and three electives.

### Graduate Certificate of Positive Behaviour Support

The perfect platform for graduates looking to upgrade and extend their knowledge and skills in Positive Behaviour Support (PBS) for individuals with disabilities.

This course capitalises on the demand for capable PBS practitioners who can not only develop and implement PBS, but also provide PBS leadership to interdisciplinary teams. This growing space provides exciting career opportunities, with PBS being the recommended framework for providing behaviour support to individuals living with disabilities under the NDIS.

### Master of Disability Policy & Practice

This masters provides advanced policy and practice knowledge, and skills which can be applied across the disability, allied health and human services professions. Students will develop advanced skills, specialist knowledge and expertise required of disability and allied health professions enabling them to work in a variety of government and non-government organisations in health, education and human service settings.

### RESEARCH PATHWAY

#### Master of Disability Policy & Practice (coursework & research)

This course has the same overall aims as the coursework pathway but also aims to equip graduates with the skills required to inform an evidence-based approach to research and practice. Eligibility for the research pathway is dependent on prior studies.

## Midwifery

Advance your skills and qualifications in midwifery practice and research with Flinders' prescribing for midwives short course. While keeping the philosophies of woman-centred midwifery, continuity of care and primary health care principles at heart, you will advance your skills and qualifications.

With increasing pressure on the health system, the demand for ANMAC accredited midwives who are qualified to prescribe scheduled medicines is expected to grow accordingly. With online delivery and topics completed in one semester, take your career to the next level and gain endorsement as a prescriber of scheduled medicines.

### Prescribing for Midwives Short Course

**.5** \* **EX**

SATAC CODE

N/A

### HOW TO ENROL

Fill out a non-enrolment form. In section 5 'Top Selection' your topic codes and topic names are as follows:

- MIDW9011, Pharmacology and Prescribing for Midwives (4.5 units)
- MIDW9012 Investigation and Diagnostics for Midwives (4.5 units)

Once completed, send the form and attached documentation by email to [askflinders@flinders.edu.au](mailto:askflinders@flinders.edu.au)

If your application is approved, you will receive an email with detailed instructions on how to access your Flinders account and enrol.

Advance your skills and qualifications with Flinders University's Prescribing for Midwives course, accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC). With online delivery and the two topics completed in one semester, take your career to the next level and gain endorsement as a prescriber of scheduled medicines.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

## Nursing

Boost your career opportunities and become an expert in your field through Flinders' postgraduate nursing programs. Equip yourself with advanced knowledge and skills for a range of healthcare environments in an acute care or primary health care specialisation. Acute care specialisations offered are Critical Care, Emergency and Mental Health. Primary Health Care specialisations offered are Child and Family Health, Diabetes Management and Education.

Flexible study options are available including online, full-time or part-time with practical delivery and assessment, personalised support and clinical experience opportunities. Develop advanced theoretical and contemporary knowledge and specialist skills based on evidence-led practice. Graduates are suitable for careers in a wide range of nursing-related fields encompassing home and health services, schools, scientific research, rehabilitation, extended care, drug and alcohol services, family and child health and public environmental health.

### COURSEWORK ONLY

#### Graduate Certificate in Nursing

The Graduate Certificate in an area of specialisation consists of 18 units of core topics, including theory-based topics and professional experience placements topics. It is designed to provide you with the opportunity to acquire advanced knowledge and skills in specialist nursing, and to apply these in a range of healthcare environments.

You will acquire research skills and apply these to the resolution and improvement of health outcomes across a range of practice contexts.

Upon completion of this accredited course, you will be eligible to apply to the Australian Health Practitioner Regulation Agency (AHPRA), for endorsement as a Nurse Practitioner by the Nursing and Midwifery Board of Australia. \* Course completion is only one of the requirements for endorsement.

### RESEARCH PATHWAY

#### Master of Nursing (coursework & research)

The Master of Nursing (Coursework and Research) aims to provide advanced studies in nursing practice and research to prepare nurses to contribute to the present and future development of health care services and the nursing profession. In addition to developing specialist nursing skills and competencies, you will have the opportunity to conduct research in an area of interest with the support of individualised supervision.

#### Master of Nursing (coursework and specialisation)

The Master of Nursing allows you to specialise and will provide you with the opportunity to further develop your advanced, specialised theoretical and practical knowledge and skills in a focused area of nursing, and apply them in a range of situations. The course aims to enable you to contribute to the development of nursing and healthcare in your chosen field.

#### Master of Nurse Practitioner

The Master of Nurse Practitioner prepares you to be a clinical leader in your field. You will have the skills and knowledge to effectively integrate and apply interdisciplinary skills to plan, implement and manage health care programs and services.

## Nutrition and Dietetics

Undertake advanced studies in nutrition and dietetics and help create a healthier world. Explore the relationship between diet, health and disease prevention to create long-lasting behavioural changes in government, industry and the community.

Integrate and apply knowledge, skills and attributes to prevent and treat illnesses by optimising the nutrition of communities and individuals around the globe.

Graduates are able to use scientific principles and critical thinking skills to consider issues affecting food supply and eating behaviours and to evaluate new developments in this rapidly evolving area.

### Master of Nutrition and Dietetics

**2** **IN**

SATAC CODE

2CM093

### COURSEWORK ONLY

This program aims to prepare students for professional practice as nutritionists or dietitians.

Graduates will be able to work across a variety of settings to integrate and apply advanced theoretical knowledge, skills and attributes to promoting health, and preventing and treating diet-related illnesses.

This degree is accredited by Dietitians Australia allowing graduates to become Accredited Practising Dietitians via membership of Dietitians Australia.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

## Occupational Therapy

Prepare yourself for professional practice as an occupational therapist who is able to work effectively across a range of settings in metropolitan and rural or remote locations

Occupational therapy aims to promote the health and participation of people, organisations and populations through engagement in everyday activities or occupations. This profession has well established research and evidence-based practice, which you will analyse and apply in this course.

### Master of Occupational Therapy

**2** **IN**

COMMONWEALTH SUPPORTED SATAC CODE

2CM133

FULL FEE PAYING SATAC CODE

2CM533

### COURSEWORK ONLY

Emphasis in this entry level (qualifying) course is placed on preparing you to become a contemporary health professional who is able to work effectively across a range of settings in metropolitan or rural/remote locations. Teaching for the course is strongly connected to clinical settings across South Australia and has close links with health care providers to best prepare you for professional practice as an occupational therapist.

This degree is accredited by the Occupational Therapy Board of Australia and the World Federation of Occupational Therapists.

## Palliative Care

This program provides leading edge content for students across the world using an interdisciplinary team approach. A flexible delivery mode makes it easy to fit around a hectic work and life schedule.

Whether experienced practitioners or graduates with basic palliative care skills, graduates can enjoy careers in areas ranging from rural and remote, acute, community, acute hospitals and aged care settings, to palliative care units and hospice care. The Aged Care focused courses have been developed to provide practitioners from backgrounds in gerontology, aged care or palliative care with education in the specialty area of palliative care in aged care.

### COURSEWORK ONLY

#### Graduate Certificate in Palliative Care

This course aims to provide an opportunity for individuals from any professional background who are working in health-related areas to deepen their knowledge base in palliative care within a global context.

The course is designed to enable practitioners to select a series of topics built on core material that will assist them to address particular needs within their practice and employment.

#### Master of Palliative Care

This Masters is designed to provide you with flexibility while aiming to deepen and extend the knowledge and skills required for practice in palliative care. It can be taken by coursework and a critical inquiry or research project. Topics cover areas such as communication at the end of life; oncology for palliative care; issues in the care of the spirit in palliative care; palliative care in aged care settings; palliative clinical management; suffering, futility and ethics in palliative care; understanding cancer; and design and ethics in research with vulnerable populations.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

## Physiotherapy

Physiotherapists work with people through the lifespan to develop, maintain and restore movement and functional ability. The physiotherapy profession has well-established research and evidence-based practice, which you will analyse and apply in this course.

Our program has a strong clinical focus with teaching mainly embedded within clinical settings across South Australia and has close links with healthcare providers to best prepare you for professional practice as a physiotherapist. Emphasis is placed on preparing you to become a contemporary health professional who is able to work effectively across a range of settings.

### Master of Physiotherapy

2 IN

COMMONWEALTH SUPPORTED SATAC CODE 2CM134

FULL FEE PAYING SATAC CODE 2CM534

### COURSEWORK ONLY

#### Master of Physiotherapy

This course aims to prepare students for professional practice as physiotherapists. Graduates will be able to practise across a range of settings, including rural and remote areas, with a focus on being client-centered and working effectively within an interdisciplinary team. This course is accredited by the Australian Physiotherapy Council and satisfies the academic requirements for registration as a physiotherapist with the Physiotherapy Board of Australia.

If you are also interested in research, please see Master of Health and Clinical Research on page 15.

# Speech Pathology

Speech pathologists provide professional services for people across the lifespan whose educational, vocational, personal and social functioning is impaired by disorders of communication and swallowing.

Graduates will be equipped to begin practice in a wide range of health, educational and community settings. The course fosters your ability to respond effectively to the changing nature of professional knowledge and practice, preparing you to provide quality services throughout your working life.

## Master of Speech Pathology

2 IN

SATAC CODE

2CM057

### COURSEWORK ONLY

In the professional studies and communication sciences stream, the content is delivered via problem-based learning tutorials. It involves working through a weekly case study in small groups facilitated by a tutor and followed up with independent learning, supportive lectures, and other learning resources. The case studies cover the areas of professional practice: speech, language, voice, fluency, swallowing and multimodal communication. These areas are considered in relation to lifespan development and socio-cultural context and how they impact health and well-being. The speech pathology skills and practice stream provide supervised workplace learning experiences throughout the course where speech pathology practice and skills are developed in real world settings. The research methods stream supports understanding of best practice principles and the development of a practitioner who is an informed consumer of research.

Graduates will meet the entry-level standards of Speech Pathology Australia, the national accrediting body, which will enable them to practice in Australia and to apply for mutual recognition of qualifications in many other countries and regions around the world, including the UK, New Zealand and Asia.

# HIGHER DEGREES BY RESEARCH

Whether you want to explore a topic that interests you in depth, create new knowledge, foster collaboration or become an expert in your field, a higher degree by research at Flinders will help you make a difference.

Work with highly-qualified and recognised supervisors, connect with industry, government and the community, and contribute to the global research conversation. Higher degrees by research transform lives and make an impact with new discoveries, leading to better lives, better communities, better care and better systems.

Higher degrees by research provide training to foster the development of independent research and critical thinking skills which demonstrate the ability to pursue scholarly research that answers significant questions.

Flinders' research is highly regarded on the world stage: nursing and nutrition and dietetics research have been rated as above world standard (Excellence in Research Australia

ERA 2018) and Flinders University as a whole had 90% of all the research it does rated world class or above (Flinders rating 89.7%, rounded up to 90%. Excellence in Research for Australia, 2018).

We provide a wide range of opportunities to research the 'wicked problems' of modern societies. How can we enable people to lead better lives through self-care and caring solutions? How do we ensure dignified care for people with dementia, those that live with chronic disease and those receiving palliative care?

Exciting HDR opportunities are aligned to the ground-breaking Flinders Caring Futures Institute and our three research centres, the Research Centre for Palliative Care and Dying,

the Digital Health Research Centre, and the Torrens Resilience Institute.

Start or continue your research journey with Flinders University, leaders in health and care.

## Doctor of Philosophy

Undertake research training at the highest level. Produce a substantial body of original research that contributes significantly to knowledge and scholarship, leading to changed and saved lives. Flinders have a number of institutes and centres with exciting HDR opportunities that make a difference.

This PhD is a time-based research degree that can be undertaken either full-time or part-time.

# MASTER OF HEALTH & CLINICAL RESEARCH

The Master of Health and Clinical Research program is an HDR pathway for professionals in any health field, giving graduates specialised knowledge and skills for research and is a pathway to studying a PhD.

The Master of Health and Clinical Research program is an 18-unit course of advanced coursework topics, as well as a time-based, supervised research project culminating in an externally-examined thesis.

Students who successfully complete the course will be eligible to apply for admission to a PhD.

For Australian Citizens HDR tuition fees are covered by the Australian Government's Research Training Program.

## Your Pathway to a PhD: Master of Health and Clinical Research (HDR)

# CARING FUTURES INSTITUTE

The Flinders University Caring Futures Institute is Australia's first fully-dedicated research organisation for the study of self-care and caring solutions, encompassing research into self-care, health and wellness, community involvement, care interventions, and health, ageing and social care systems and services.

We work with leading care organisations, health professionals, community partners and consumers to pioneer outcome-driven research that makes a positive impact on people's lives.

The Caring Futures Institute supports diversity and warmly welcomes applications from Aboriginal and Torres Strait Islander candidates and those with lived experience of disability or marginalisation.

**HDR opportunities and supervisors within the Caring Futures Institute are aligned to the following research fields. We also welcome and encourage your research project ideas that may not fit into the areas of focus below.**

## Better Lives

- Healthy living across the lifespan
- Exercise for life
- Food for life

## Better Communities

- Disability and Community Inclusion
- Marginalisation and Vulnerability
- Cultural Diversity

## Better Care

- Technological and Digital Solutions for Care
- Cardiovascular Care
- Fundamentals of Care
- Clinical Rehabilitation

## Better Systems

- Health and Social Care Economics and Quality of Life
- Caring Workforce of the Future

## CO-DESIGN & COLLABORATION

We are working with universities, institutes and professionals around the world to deliver industry-changing care and self-care solutions to maximise people's quality of life and wellbeing no matter where they are. At every stage, our researchers collaborate with health professionals, carers, consumers, service providers, industry, funders and policy makers. Community engagement is a key focus of the Institute with involvement in research at every level from governance to implementation.

# FLINDERS DIGITAL HEALTH RESEARCH CENTRE

Flinders Digital Health Research Centre conducts research into the development and deployment of digital solutions (such as mobile apps and online portals) to support consumers in managing their own health, and health care providers in delivering services using innovative new models of care. We focus on projects for wellness and ageing in addition to conventional areas of health informatics such as clinical applications, health technologies and cyber security.

**Research Field: technology in health**

---

# RESEARCH CENTRE FOR PALLIATIVE CARE, DEATH AND DYING

The Research Centre for Palliative Care, Death & Dying explores the universal experience of death and dying and champions the contribution of palliative care to the person, the health professional and the health system.

**Research Field: death and dying**

---

# TORRENS RESILIENCE INSTITUTE

The Torrens Resilience Institute is one of Australia's longest-standing research institutes dedicated to disaster preparedness and management. Our research is advancing the concept of resilience and helping organisations, communities and nations balance disaster preparedness and prevention, response and recovery.

Our research advises and guides government policy, prepares communities and empowers people to minimise the impacts of possible natural hazards, health emergencies and health security or humanitarian and other emergencies in Australia and around the world.

**Research Field: health emergencies and health security**

---

# SPORT, HEALTH, ACTIVITY, PERFORMANCE AND EXERCISE (SHAPE) RESEARCH CENTRE

The SHAPE Research Centre is uniquely focused on sport, health, activity, performance and exercise. Our research is bringing experts together to tackle emerging health concerns, particularly through a sport, physical activity and exercise lens.

**Research Field: Physical activity, movement behaviour, sport, physical education and exercise science.**

# HOW DO I APPLY?

Applicants need to apply through the South Australian Tertiary Admissions Centre (SATAC): [satac.edu.au](http://satac.edu.au)

## 1. Select your preferred course.

Explore our full range of postgraduate courses at [flinders.edu.au/study](http://flinders.edu.au/study)

## 2. Check entry requirements.

Most graduate entry bachelor degrees, graduate certificates and graduate diplomas require a three-year undergraduate degree from an Australian university or equivalent.

There are also minimum entry requirements for each course. But if you don't meet the requirements you may be admitted (subject to specific conditions) at the discretion of the College offering the course.

Overseas qualifications need to be equivalent to the above to be considered for entry.

## 3. Check individual course entries on SATAC for information on important dates.

Use SATAC's course search to check individual course entries for information on important dates. You will find information on commencement date options, relevant closing date(s) for applications, and the timing of offers.

[satac.edu.au/pages/postgraduate-course-search](http://satac.edu.au/pages/postgraduate-course-search)

## 4. Apply online at SATAC.

Apply for postgraduate coursework at Flinders through the South Australian Tertiary Admissions Centre (SATAC).

[satac.edu.au/postgraduate](http://satac.edu.au/postgraduate)

Applicants for HDR apply directly through Flinders University: [flinders.edu.au](http://flinders.edu.au)

## 1. CONFIRM YOUR ELIGIBILITY

## 2. CONFIRM YOUR SUPERVISOR

Ensure an academic staff member has agreed to supervise your HDR Project

## 3. PREPARE YOUR DOCUMENTATION

HDR applicants are required to provide a research outline, research experience statement and academic transcripts prior to submitting your application. Ensure you have reviewed the course rule and course information page for any additional requirements.

## 4. APPLY ONLINE AT FLINDERS

[flinders.edu.au](http://flinders.edu.au)

# KEY DATES

## Flinders Open Days:
