Taking your first step into university life is a big change. New faces, new spaces, new experiences.

That’s why at Flinders, we do all we can to make your time at university the best it can be.

Our facilities are purpose-built for your study needs, providing the best the world has to offer.

Plugged into industry trends, professional placements and practical experiences, our teaching is designed to equip you with up-to-the-minute knowledge based on our world-class research. You’ll gain specialised skills and knowledge in your chosen field plus develop abilities in independent thinking, communication, collaboration, ethics and creativity – qualities that will prepare you to become an expert and innovator in your field.

Everything we do at Flinders is designed to give you the best possible study experience and to provide you with everything you’ll need to graduate future ready.

THE WORLD NEEDS ENGINEERS

ENGINEERING

A CAREER POWERED BY CREATIVITY

STUDY ENGINEERING AT FLINDERS

Make a difference to the world around you. Engineers help build the future, and you could be one of them.

DESIGN THE FUTURE OF YOUR DREAMS

There are few fields as broad or as rewarding as engineering. If you can imagine it, chances are you can help bring it to life. From robotics to renewable energy, ship building and defence, civil engineering or creating new medical technologies... the list is long and the opportunities are broad. You can help design and build tomorrow.

A REWARDING CAREER

Engineers are in high demand worldwide. Demand for electrical engineers is increasing. The world of robotics is changing rapidly and large scale civil engineering projects are being conducted in many areas. A career in engineering can be interesting, challenging and rewarding.

STUDY FOR SUCCESS

Flinders Engineering degrees are offered in close collaboration with industry. This means you will gain specialist knowledge and an integrated ‘toolbox’ of skills that will enable you to meet the requirements of industry as it continues to change. You’ll be plugged into our $120m hub of innovation and entrepreneurship at Tonsley, and graduate with a high level of skills, ready to take on the world.
Bachelor of Design and Technology Innovation

Make your ideas a commercial reality.

Graduate prepared to solve problems and create commercial solutions. This degree prepares you to do this by developing a sound understanding of three areas: design, innovation management, and science, technology and engineering.

You’ll be taught desirable skills that will allow you to design and develop new products or services to solve a range of real-world problems.

Bachelor of Design and Technology Innovation

Bachelor of Engineering (Biomedical) (Honours)

Build a career designing systems that enhance the quality of human life.

Health care is a large and rapidly growing industry, and your skills could help improve the way we plan, design, manufacture and maintain healthcare systems and equipment. You will gain a solid education in both engineering and medical science, along with important practical skills and the ability to work as part of an effective team that will see you graduate work-ready.

* Knowledge of SACE stage two physics or equivalent.
** Knowledge of SACE stage two mathematics, mathematical methods or equivalent.

You’ll learn to match a problem to technology to create a commercial solution.

- You’ll gain an understanding of industrial design, technology and innovation in one degree.
- Enhance your employability with highly attractive, vital skills in the rapidly changing innovation sector.
- Gain practical, hands-on exposure to the cutting-edge equipment and facilities of Flinders University’s new technology precinct at Tonsley.

You’ll have the chance to participate in a 12-week industry work-integrated placement.

This degree is recognised by the Design Institute of Australia.

There are opportunities to take your studies overseas with a 12-week practical work experience placement in Europe, Asia or North America.

CAREER OPPORTUNITIES

Your degree is the first step towards a range of employment opportunities, including:

- product designer
- business development manager
- commercialisation specialist
- graduate consultant
- innovation strategist.

Potential employers include:

- CSR Limited
- CSIRO
- Department of Industry, Innovation and Science
- Clipal
- Adidas.

- You’ll gain a solid education in both engineering and medical science, along with important practical skills and the ability to work as part of an effective team that will see you graduate work-ready.

- You’ll study unique topics such as rehabilitation and assistive technology.

- Flinders biomedical and materials engineering research is world class, and graduates have won Monash Scholarships, Fulbright Scholarships, Churchill Fellowships and Menzies Scholarships.

- Choose a specialisation in mechanics-based or electronics-based biomedical engineering.

- Our on-campus Medical Device Research Institute and Medical Device Partnering Program bring together some of the leading minds in biomedical engineering and related disciplines.

- Through our extensive industry links, undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.

- This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

CAREER OPPORTUNITIES

Your degree is the first step towards a range of employment opportunities, including:

- biomedical engineer
- clinical support specialist consultant
- customer support engineer
- pathology field service engineer
- instrumentation engineer.

Potential employers include:

- Chemtronics Biomedical Engineering
- Ewok HealthCare
- Bio-Rad Laboratories Pty Ltd
- Brainlab
- The Queen Elizabeth Hospital.

“Studying at Flinders has helped me find my feet again after eight years in the military. I love using Tonsley’s facilities and know that the engineering degrees I have pursued will give me the best job outcome.”

Chris Turner, Bachelor of Civil and Mechanical Engineering

Find out more: flinders.edu.au/engineering
Bachelor of Engineering (Biomedical) (Honours)/Master of Engineering (Biomedical)

Take your career to the next level with a five-year undergraduate pathway to a biomedical engineering masters.

Health care is a large and rapidly growing industry, and your skills could help improve the way we plan, design, manufacture and maintain healthcare systems and equipment. You will gain a solid education in both engineering and medical science, along with important practical skills and the ability to work as part of an effective team that will see you graduate work-ready.

- You’ll study unique topics such as rehabilitation and assistive technology.
- Finders biomedical and materials engineering research is world class, and graduates have won Monash Scholarships, Fulbright Scholarships, Churchill Fellowships and Mencies Scholarships.
- Choose a specialisation in mechanics-based or electronics-based biomedical engineering.
- Our on-campus Medical Device Research Institute and Medical Device Partnering Program bring together some of the leading minds in biomedical engineering and related disciplines.
- Through our extensive industry links, undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.
- This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

CAREER OPPORTUNITIES
Your degree is the first step towards a range of employment opportunities, including:
- biomedical engineer
- clinical support specialist consultant
- customer support engineer
- pathology field service engineer
- instrumentation engineer

Potential employers include:
- Chemtronics Biomedical Engineering
- Epworth HealthCare
- Bio-Rad Laboratories Pty Ltd
- Brainlab
- The Queen Elizabeth Hospital.

Bachelor of Engineering (Civil) (Honours)

Use your creativity and innovation to build a career solving civil engineering problems.

Prepare yourself for a career solving civil engineering problems. You’ll learn how to create innovative solutions that consider social, economic and environmental concerns. This degree covers the four main civil engineering themes of structures, transport, water and geomechanics, then applies them to infrastructure design and construction.

- Learn to plan, design, build and maintain buildings, infrastructure and resources.
- Learn in purpose-built civil engineering labs and facilities.
- Choose a specialisation in mechanics-based or electronics-based biomedical engineering.
- Our on-campus Medical Device Research Institute and Medical Device Partnering Program bring together some of the leading minds in biomedical engineering and related disciplines.
- Through our extensive industry links, undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.
- This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

CAREER OPPORTUNITIES
Your degree is the first step towards a range of employment opportunities, including:
- graduate civil engineer
- graduate civil design engineer
- traffic and road safety officer
- graduate project manager
- laboratory engineer

Potential employers include:
- SA Department for Planning, Transport and Infrastructure
- Arup
- Lendlease
- Australian Rail Track Corporation
- City of Marion Council.

Find out more
flinders.edu.au/engineering
Bachelor of Engineering (Maritime) (Honours)

Use your skills to make waves in the maritime engineering industry.

Prepare to become a professional engineer in the maritime engineering industry. You’ll learn to design and manage the building of maritime vehicles, coastal engineering projects, port and harbour facilities, and offshore oil and gas installations. You’ll develop practical skills in mechanics and structures, ship design, hydrostatics and fluid mechanics, thermodynamics and energy engineering.

Bachelor of Engineering (Mechanical) (Honours)

Push mechanical systems to the limit in a challenging and rewarding field.

Build a hand-on career with real-world applications. Learn to design, construct and operate mechanical systems. This degree encourages you to push the boundaries, preparing you for the future of mechanical systems engineering. You’ll learn to apply the principles of physics, materials science and mathematics, and build depth of knowledge in materials, mechanics, design, thermodynamics and fluid mechanics.

Bachelor of Engineering (Mechanical) (Honours) (Robotics) (Honours)

Create a career designing the robotic workforce of the future.

If you’re a high-achieving student, take a pathway that allows you to complete a program of study in mechanical and biomedical engineering in only five years. You could work towards a career in many areas in the mining, defence, manufacturing, shipbuilding, environmental, engineering consultancy, building services, automotive and petrochemical industries, or in the design and production of diagnostic and therapeutic medical equipment in hospitals, devices to assist in home-based health care and rehabilitation, and sensory and control systems.

Bachelor of Engineering (Mechanical) (Honours)/Master of Engineering (Biomedical)

From mechanical engineering to a biomedical engineering master, engineer your way to a great career.

Changes to the way our workforce operates are opening up career opportunities in fields like robotics. This degree will see you graduate with the latest learning in robotics technologies, preparing you to become a key player in developing the robots that will populate our future. The degree combines electronics, computer control, signal processing and programming in the design, development and application of robots, and their integration with other systems in the work environment.
Bachelor of Engineering (Robotics) (Honours)/Master of Engineering (Electronics)

Engineer your career. From robotics engineering to an electronics engineering masters.

Take part in a combination that allows high-achieving students like you to complete a program of study in robotics and electronics in only five years, and graduate ready for a career in an exciting and challenging field.

It combines electronics, computer control, signal processing and programming in the design, development and operation of robots, and their integration with other systems in the work environment.

• You’ll study a robotics degree based on key elements of the latest robotics technology, and learn about electronics, computer control, signal processing, development and application of robots.
• Continue to a Master of Engineering (Electronics) to open up even more career opportunities.
• Put your robotics engineering skills to the test in a range of national competitions like NI-ARC, AGVC, and Maritime RobotX Challenge.
• You’ll access purpose-built state-of-the-art teaching and laboratory facilities and heavy engineering pods at Tonsley.
• Undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.
• There are opportunities to take your studies overseas with a student exchange program.
• This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

CAREER OPPORTUNITIES
Your degree is the first step towards a range of employment opportunities, including:
• robotics engineer
• robotics sensor integration specialist
• mechatronic engineer
• process and automation engineer
• instrument engineer.

Potential employers include:
• Lockheed Martin
• Smart Automation Systems
• Monadelphous
• Simavita
• Rocket Lab.

Find out more flinders.edu.au/engineering
Bachelor of Engineering (Software) (Honours)

Build a career combining your engineering skills with the power of computer technology.

Widen your career opportunities with this future-oriented course, enabling you to choose a course of study with either an electronics or computer science specialisation.

Bachelor of Engineering Science

Get a career edge with a broad foundation in engineering principles.

Develop the practical skills you’ll need for a rewarding career, and graduate work-ready. In this degree you’ll gain the foundations for further study in engineering or for a career in an engineering-related field. The degree offers specialisations in biomedical engineering, civil engineering, electrical and electronic engineering, mechanical engineering, software engineering, and design and technology.

Bachelor of Engineering (Software) (Honours)

There’s more than one way to get into an engineering degree at Flinders.

At Flinders we recognise that everyone is an individual. That’s why we provide flexible entry pathways into our engineering courses.

Bachelor of Engineering Science

Get a taste of engineering before choosing your specialisation.

Embark on a first-year engineering degree without choosing the engineering specialisation you wish to pursue with the Bachelor of Engineering (Honours) – Flexible Entry. At the end of your first year you can transition to a named engineering degree of your choice without having to study the standard four-year course.

This degree provides a pathway to the following degrees:

- Bachelor of Engineering (Biomedical) (Honours)
- Bachelor of Engineering (Civil) (Honours)
- Bachelor of Engineering (Maritime) (Honours)
- Bachelor of Engineering (Mechanical) (Honours)
- Bachelor of Engineering (Robotical) (Honours)
- Bachelor of Engineering (Software) (Honours)

Potential employers include:
- Defence Science & Technology Group
- CSIRO
- Department of Industry, Innovation and Science
- Agilent Technologies.

More information on the Bachelor of Engineering Science can be found on page 14.

Find out more at flinders.edu.au/engineering
We’re lucky to have so much amazing technology at our fingertips at Tonsley. The fact that I get to study where the latest technology is being developed makes me feel like I am part of something bigger.

Alex Benn, Bachelor of Robotics Engineering (Honours)/Bachelor of Computer Science

Mathematics is the foundation of many industries. Demand for mathematics graduates is particularly strong in areas including science, engineering, technology and business, and in areas as diverse as linguistics and health. Your skills and knowledge of mathematics could lead to a challenging, long-term career.

In this degree, you’ll gain a foundation in the principles and techniques of modern mathematics, and learn how to apply these skills to solve today’s problems. The degree is designed to produce industry-focused graduates who are in demand in a range of careers that use mathematics.

Bachelor of Mathematical Sciences

- Your studies will focus on both pure and applied mathematics and statistics.
- You can choose topics in other disciplines that use applied mathematics, such as medicine, business, physics and the environment.
- You’ll develop advanced research, communication and technical skills.
- Focus on advanced pure and applied mathematics in our Mathematical Sciences Laboratory.
- The degree is designed to exceed the Australian Mathematical Society’s accreditation standards.
- Join the university that produced Australia’s Fields Medal winner, Professor Terence Tao.

CAREER OPPORTUNITIES

Your degree is the first step towards a range of employment opportunities, including:
- credit bureau analyst
- data and analytics officer
- consultant – data analytics
- quantitative assistant trader
- consumer research executive.

Potential employers include:
- Mercer
- Bureau of Meteorology
- Australian Bureau of Statistics
- The Nielsen Company (Australia)
- Australian Securities and Investments Commission.

Combined degrees

All science and engineering degrees can be combined. By combining your degree with a qualification in another discipline, you’ll connect diverse knowledge in unique ways and develop specialised abilities to help you stand out from the pack. Studying a combined degree at Flinders is the key to enhancing your career opportunities.

For a full list of combined degree options visit flinders.edu.au/combineddegrees

Example degree combination

Bachelor of Design and Technology Innovation/Bachelor of Science (Environmental Science)

SATAC CODE 224772

Develop your scientific skills in order to solve problems in a variety of fields and create commercial solutions.

Find out more flinders.edu.au/engineering
With more than 150 staff and 2,000 students – and a 2,000 square metre pod for heavy engineering equipment – Tonsley is a place where Flinders University students interact with business and where business interacts with Flinders researchers in areas such as engineering, medical devices and nanoscale technologies.

Flinders at Tonsley centrally locates computer science, engineering and mathematics at Flinders University, with the New Venture Institute, Medical Device Research Institute and Centre for Nanoscale Science and Technology, alongside some of Adelaide’s biggest businesses and industries.

Tonsley is located centrally between Flinders University’s Bedford Park campus and Adelaide city. It’s connected to the city by train, offering convenient access 15 minutes from the city’s CBD. And Tonsley is a five-minute car ride, a 15-minute ride on the Flinders loop bus, or a 30-minute walk from the Bedford Park campus.

Tonsley embodies world’s best practice in education, teaching and research. It’s a place where innovation, collaboration and entrepreneurial spirit combine to create the products and processes of the 21st century and beyond.

We’re here to help

Whatever you decide to study at Flinders, we’re always here to help you succeed.

Transition to university
Starting at university is a big step; let’s make it easier.
The Transition Office can help make your shift into university study as smooth as possible, and the Student Learning Centre provides a range of services from writing and mathematics support to assistance with study and time-management skills.

Work Integrated Learning
Work Integrated Learning (WIL) enables you to gain work experience while you study.
Flinders aims to provide each and every student with access to a WIL opportunity during their studies through placements, practicums, field studies, and simulated workplace settings and assessment activities.

Scholarships
Flinders University offers over 550 undergraduate scholarships, worth $2.2m in total. A generous range of scholarships is available to new and continuing undergraduate students.

Flinders Connect
Flinders Connect can help with everything from enrolment and fees to exams and graduation.
You can also access Flinders Connect for specialist services in admissions, careers and IT help. A range of support services is also available.

Flinders University Student Association (FUSA)
Flinders has a long history of active student involvement.
The Flinders University Student Association (FUSA) continues that tradition, and represents the rights and interests of students. FUSA manages social events, non-sporting clubs and societies, the student publication Empire Times, and helps with academic, administrative and welfare issues.

Careers & Employability Service
The Careers and Employability Service helps give you the edge in your career.
CareerHub, our online employment portal, is more than a service to help you prepare for and find the job you want. It offers personalised job opportunities, career planning, programs to help you broaden your skills and experience, access to employer events and career-related resources.
Whatever you are studying, CareerHub can help you find your direction and start your career.

INNOVATION & ENTERPRISE

Careers are evolving and the workplace of the future will look very different from today.
That’s why we offer a suite of innovation and enterprise electives and courses to prepare you for the careers of tomorrow. Powered by Flinders’ New Venture Institute, these electives will help you to develop the ‘personal enterprise skills’ that employers are looking for, and equip you with the ability to adapt to whatever life throws at you, personally and professionally.
Find out more flinders.edu.au/innovation
How do I apply?

Applicants need to apply through the South Australian Tertiary Admissions Centre (SATAC): satac.edu.au

To find out more about your admission pathways to Flinders, visit: flinders.edu.au/pathways

ADMISSION PATHWAYS

At Flinders, we recognise that every prospective student is an individual and that what works for one might not be right for another.

That’s why we provide various admission pathways into Flinders University and your preferred degree. You’re encouraged to explore your options and find the entry path that’s right for you.

Year 12 entry

The majority of Year 12 applicants enter university via the traditional competitive entry method, where offers are made to eligible applicants with the highest selection rank until all places in the degree are filled.

Your selection rank is used by Flinders to assess your admission to a course, and is based on your ATAR plus any adjustment factors for which you are eligible. The 2020 Minimum Selection Rank is the minimum selection rank required for consideration to enter in the next intake. The 2020 selection rank indicates the lowest rank for which an offer was made to an applicant in that degree for the previous year (including any adjustment factors). This selection rank is provided only as a guide for 2021 entry, as it may change from year to year.

Adjustment factors

Adjustment factors (formerly referred to as bonus points) may be used in combination with your ATAR to derive your course selection rank. Adjustment factors may be available for South Australian Year 12 students applying for entry to Flinders in 2021: the SA Universities Equity Scheme (USES) and the SA Language, Literacy and Mathematics Bonus Scheme (LLM).

Guaranteed entry selection rank

Achieve a selection rank equal to or above the published guaranteed entry selection rank and you’ve been guaranteed a place at Flinders. All you need to do is ensure you have listed Flinders degrees first in your preferences and you will be offered a place in the highest Flinders degree preference that you are eligible for in 2021.

unitTEST

If you’re a school leaver, unitTEST is your chance to increase your options to gain a place in your preferred degree. unitTEST is designed for school leavers and complements existing selection criteria by enhancing your overall selection rank.

Foundation Studies

The Foundation Studies program has been designed to introduce you to university study in a supportive learning environment. Open to people from all backgrounds, Foundation Studies provides a pathway to gain entry to most degrees at Flinders and offers guaranteed entry into some degrees.

TAFElink

Flinders offers guaranteed entry to selected degrees for applicants who have completed a TAFE/VET certificate IV or higher-level qualification, as long as degree prerequisites are met. Importantly, your TAFE/VET qualification does not need to be related to your selected area of study at Flinders.

TAFE SA dual offers

You can apply for a TAFE SA (RTQ codes: 41028) diploma or advanced diploma that is linked to a Flinders degree. You’ll receive an offer to both TAFE SA and Flinders University and, on successful completion of the TAFE course, you’ll have secured an offer for a Flinders degree. TAFE SA dual offers are available for a range of Flinders degrees.

Adult entry

The adult entry scheme enables people aged 18 years and over to apply to study at Flinders via the Special Tertiary Admissions Test (STAT). Applications are made via SATAC.

Tertiary transfer

If you have completed at least one semester of full-time equivalent study at university, you may be able to transfer to study at Flinders University using your grade point average (GPA).

BACHELOR OF GENERAL STUDIES

The Bachelor of General Studies (SATAC code: 234181) is a flexible degree that provides a sound basis of knowledge in an area of your choice. It is designed to prepare you with communication skills, a firm grasp of ethics, and the confidence to make connections across geographical, disciplinary, social and cultural boundaries. Successful completion of the first year to the required standard also provides you with guaranteed entry into a range of our degrees.

Get more out of your degree

Whatever you’re studying, Flinders gives you the opportunity to do more with your degree to help you have a competitive edge when you graduate.

A combined degree is a combination of two Flinders bachelor degrees, meaning you will have two qualifications in just one to one-and-a half years of extra study and undertake in-depth study in exciting combinations that aren’t usually available in single degrees. The Bachelor of Letters is available to study alongside any degree at Flinders and enables you to graduate with two qualifications.

WHEN CAN I START?

Flinders offers two admissions cycles each year for undergraduate degrees.

Semester 1 – February start.

Semester 2 – July start.

Applications open in August for commencement the following year.

GET MORE OUT OF YOUR DEGREE

Flinders gives you the opportunity to have a competitive edge when you graduate. A combined degree is a combination of two Flinders bachelor degrees, meaning you will have two qualifications in just one to one-and-a half years of extra study and undertake in-depth study in exciting combinations that aren’t usually available in single degrees. The Bachelor of Letters is available to study alongside any degree at Flinders and enables you to graduate with two qualifications.

STUDENT HUB & PLAZA

Open 24/7, the award winning Hub and Plaza brings the best of coffee and street food culture to the heart of the Bedford Park campus, with retail options, innovative study spaces and free wi-fi access.

FOOD & DRINK

You’ll never go hungry at Bedford Park, with a wide variety of food outlets.

RETAIL

Bedford Park features a range of retail outlets.
