"Engineering is such an exciting field because it’s always changing and evolving, which means that the problems we’re faced with today will be completely different in a decade’s time. This degree has equipped me with the skills I need for a strong start in the field I’m pursuing, in both technical and professional aspects."

An Lam
Graduate, Bachelor of Engineering (Mechanical) (Honours)/Master of Engineering (Biomedical)
The career of your dreams

Engineers are in high demand worldwide. Demand for electrical engineers is increasing. The world of robotics is changing rapidly, and large-scale civil engineering projects are being conducted in many areas. From robotics to renewable energy, shipbuilding and defence, civil engineering or creating new medical technologies... Flinders Engineering graduates are working in a broad range of engineering fields across the globe. You can help design and build tomorrow.

Graduate ready for success

Flinders Engineering degrees are offered in close collaboration with industry. You'll be plugged into our $300 million hub of innovation and entrepreneurship at Tonsley, studying alongside some of Adelaide’s biggest businesses and globally recognised organisations such as SAGE, Siemens, SIMEC-ZEN Energy, Tesla, Micro-X and Rockwell Automation. Graduate career-ready and ready to take on the world.

Up to 18 months with industry

Flinders Engineering’s Work Integrated Learning (WIL) program is South Australia’s longest industry placement. All Flinders Engineering students have the opportunity to undertake a 20-week industry placement as part of their degree, helping them graduate work-ready. Honours students complete a research placement enabling them to work alongside professional engineers, tackling real-world problems, for up to 18 months in total.

No. 1 in Australia for learning resources*

* The Good Universities Guide 2020 (undergraduate)

SA’s longest engineering placement**

** Public SA-founded universities only

Graduate prepared to solve problems and create commercial solutions. This degree prepares you to do this by developing a sound understanding of three areas: design, innovation management; and science, technology and engineering. You’ll be taught desirable skills that will allow you to design and develop new products or services to solve a range of real-world problems.

- Gain an understanding of industrial design, technology and innovation in one degree and learn to match a problem with technology to create a commercial solution.
- Enhance your employability with highly attractive, vital skills in the rapidly changing innovation sector.
- Gain practical, hands-on exposure to the cutting-edge equipment and facilities of Flinders University’s new technology precinct at Tonsley.
- You’ll have the chance to participate in a 12-week industry work-integrated placement.
- This degree is recognised by the Design Institute of Australia.
- There are opportunities to take your studies overseas with a 12-week practical work experience placement in Europe, Asia or North America.

Career opportunities

Your degree could open up a range of employment opportunities, including:
- product designer
- business development manager
- commercialisation specialist
- graduate consultant
- innovation strategist.

Potential employers include:
- CSR Limited
- CSIRO
- Department of Industry, Innovation and Science
- Climal
- Adidas.

Health care is a large and rapidly growing industry, and your skills could help improve the way we plan, design, manufacture and maintain healthcare systems and equipment. You will gain a solid education in both engineering and medical science, along with important practical skills and the ability to work as part of an effective team that will see you graduate work-ready.

- You’ll study unique topics such as rehabilitation and assistive technology.
- Flinders’ biomedical and materials engineering research is world class, and graduates have won Monash Scholarships, Fulbright Scholarships, Churchill Fellowships and Menzies Scholarships.
- Choose a specialisation in mechanics-based or electronics-based biomedical engineering.
- Our on-campus Medical Device Research Institute and Medical Device Partnering Program bring together some of the leading minds in biomedical engineering and related disciplines.
- Through our extensive industry links, undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.
- This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

Career opportunities

Your degree could open up a range of employment opportunities, including:
- biomedical engineer
- clinical support specialist consultant
- customer support engineer
- pathology field service engineer
- instrumentation engineer.

Potential employers include:
- Chemtronics Biomedical Engineering
- Epworth HealthCare
- Bio-Rad Laboratories Pty Ltd
- Brainlab
- The Queen Elizabeth Hospital.
ENGINEERING

Bachelor of Engineering (Biomedical) (Honours)/Master of Engineering (Biomedical)

Health care is a large and rapidly growing industry, and your skills could help improve the way we plan, design, manufacture and maintain healthcare systems and equipment. You will gain a solid education in both engineering and medical science, along with important practical skills and the ability to work as part of an effective team that will see you graduate work-ready.

Prepare yourself for a career solving civil engineering problems. You’ll learn how to create innovative solutions that consider social, economic and environmental concerns. This degree covers the four main civil engineering themes of structures, transport, water and geomechanics, then applies them to infrastructure design and construction.

Bachelor of Engineering (Civil) (Honours)

Be a part of the next generation of electrical and electronic technology. Electrical engineering is concerned with large-scale electrical systems including renewable power generation and electric motors. Electronic engineering focuses on lower voltage systems such as computer systems, communication networks and integrated circuits.

Bachelor of Engineering (Electrical and Electronic) (Honours)

Choose from a range of majors that allow you to follow your interests and graduate ready to take on the world. Flinders Bachelor of Engineering (Civil) (Honours) allows you to select a major in any of the following areas:

Civil infrastructure

This is a broad major that focuses on all aspects of civil engineering covering structural engineering, transport systems, geotechnical engineering and water engineering in depth.

Environmental engineering

Explore the environmental and sustainability aspects of civil engineering. On top of the solid civil engineering core you will study topics such as sustainable engineering, waste management and hydrochemistry.

Structural engineering

Study the development of civil engineered structures. To expand on your core civil engineering studies, you will also focus on concrete analysis and design, foundation design, and fatigue and fracture analysis.

Transport systems engineering

This major focuses on the development of transport solutions in civil engineering. Career focused and industry informed, topics will include transport planning, modelling and remote sensing.

Majors Bachelor of Engineering (Civil) (Honours)

Choose from a range of majors that allow you to follow your interests and graduate ready to take on the world. Flinders Bachelor of Engineering (Electrical and Electronic) (Honours) allows you to select a major in any of the following areas:

Advanced electrical engineering

This major focuses on electrical engineering and includes study in electrical energy systems including high voltage electrical power and renewable energy.

Advanced electronic engineering

Supplementing your core studies, this major focuses on the use of electronics as a component of computers, communications technology and control systems.

Computer and network systems

Study the application of electrical and electronic technology to create computer systems and networked devices.

Electronic systems and security

Take your studies to the cutting edge. This major focuses on the electromagnetic spectrum and the way in which electronics can be used to assure electromagnetic security.
Bachelor of Engineering (Electrical and Electronic) (Honours), Master of Engineering (Mechanical)

Many companies want engineers that combine the skills of electrical and electronic engineers with those of mechanical engineers.

SATAC code: 244571
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: 95.00
Guaranteed entry selection rank: 95.00
TAFElink: NA
Adjustment factors: Yes

This degree combination is unique in South Australia.
This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.

Career opportunities
Your degree could open up a range of employment opportunities, including:
• graduate mechanical, electronic or electrical engineer
• graduate project engineer (mechanical and/or electrical and electronic)
• process development engineer/scientist

Potential employers include:
• design consultancies
• construction companies
• defence industry
• government and universities.

Bachelor of Engineering (Civil) (Honours)/Master of Engineering Management

The civil engineering component is a comprehensive, accredited degree covering the four main civil engineering themes of structures, transport, water and geomechanics. The engineering management component combines the problem-solving and technical design ability of engineering with executive organisational skills and the planning power of business and management.

SATAC code: 244561
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: 95.00
Guaranteed entry selection rank: 95.00
TAFElink: NA
Adjustment factors: Yes

Combine the advantages of being an in-demand environmental engineer with the knowledge needed to become an accredited civil engineer.

Bachelor of Engineering (Environmental) (Honours)/Master of Engineering (Civil)

Combines the advantages of being an in-demand environmental engineer with the knowledge needed to become an accredited civil engineer.

SATAC code: 244581
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: 99.65
Guaranteed entry selection rank: 95.00
TAFElink: Diploma or above
Adjustment factors: Yes

Bachelor of Engineering Technology (Systems and Security)/Bachelor of Science (Physics)

Developed in collaboration with the Defence Science and Technology Group within the Department of Defence, the course encompasses a wide range of communication mediums including radar, radio and microwaves.

SATAC code: 244701
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: New in 2023
Guaranteed entry selection rank: NA
TAFElink: Diploma or above
Adjustment factors: Yes

Bachelor of Engineering Technology (Advanced Manufacturing and Digital Design)

Continued with substantial industry input and support, this course enables students to learn both the fundamentals and the practical application of a range of advanced manufacturing, digital design and industry 4.0 techniques.

SATAC code: 244711
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: New in 2023
Guaranteed entry selection rank: 76.00
TAFElink: Diploma or above
Adjustment factors: Yes

* SACE stage two specialist mathematics or mathematical methods or equivalent.
** Knowledge of SACE stage two physics or equivalent is assumed.

Bachelor of Engineering Technology (Systems and Security)/Bachelor of Science (Physics)

This four-year combined degree represents a unique and exciting pathway to work in a cutting-edge, high-technology area.

SATAC code: 244721
Prerequisites: Yes*
Assumed knowledge: Yes**
2022 selection rank: New in 2023
Guaranteed entry selection rank: NA
TAFElink: Diploma or above
Adjustment factors: Yes

* SACE stage one mathematics or stage two general mathematics or equivalent.
** Knowledge of SACE stage two general mathematics or equivalent is assumed.
Environmental engineering is where advances in science and technology are transformed into practical solutions that will protect and improve the quality of our environment. Environmental engineers are problem-solvers who design solutions to a range of hazards from airborne and waterborne diseases, water and air pollution, wastewater management, and recycling. They implement environmental engineering law and assess the environmental impact of proposed projects.

Prepare to become a professional engineer in the maritime engineering industry. You’ll learn to design and manage the building of maritime vehicles, coastal engineering projects, port and harbour facilities, and offshore oil and gas installations. You’ll develop practical skills in mechanics and structures, ship design, hydrodynamics and fluid mechanics, thermodynamics and energy engineering.

### Bachelor of Engineering (Environmental) (Honours)

- **Prerequisites:**
  - Assumed knowledge: Yes**

- **Assumed knowledge: Yes**

- **2022 selection rank:** 75.00

- **Guaranteed entry selection rank:** 90.00

- **TAFELink:** Dip or above

- **Adjustment factors:** Yes

**You can specialise in naval architecture, ocean engineering, or marine and offshore systems.**

- **You’ll have access to state-of-the-art experimental facilities at Flinders University and the Australian Maritime College in Launceston.**

- **Learn how to enable better exploration of our ocean environment without putting humans at risk.** This degree is designed to serve the needs of the maritime engineering design, construction and related industries.

- **Career opportunities are available in Australia, Europe, USA, UK and Asia.**

- **Complete a professional work placement with a maritime engineering company as part of your studies.**

- **This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.**

- **This course is also recognised by the Royal Institution of Naval Architects and the Institute of Marine Engineering, Science and Technology.**

**Career opportunities Your degree could open up a range of employment opportunities, including:**

- **water supply and wastewater treatment engineer**
- **environmental health engineer**
- **air pollution management engineer**
- **environmental impact assessor.**

**Potential employers include:**

- building and construction companies
- government and universities
- manufacturing industry
- mining and resources industry.

### Bachelor of Engineering (Maritime) (Honours)

Build a hands-on career with real-world applications. Learn to design, construct and operate mechanical systems. This degree encourages you to push the boundaries, preparing you for the future of mechanical systems engineering. You’ll learn to apply the principles of physics, materials science and mathematics, and build depth of knowledge in materials, mechanics, design, thermodynamics and fluid mechanics.

- **Prerequisites:**
  - Assumed knowledge: Yes**

- **Assumed knowledge: Yes**

- **2022 selection rank:** 75.00

- **Guaranteed entry selection rank:** 90.00

- **TAFELink:** Dip or above

- **Adjustment factors:** Yes

**You’ll have access to purpose-built, state-of-the-art teaching and laboratory facilities and heavy engineering pods.**

- **You’ll experience personalised teaching and great staff-student working relationships across your studies.**

- **You can put your mechanical engineering skills to the test in a range of national competitions like the Solar Car Challenge and War Warman Design Competition.**

- **Become involved in Formula SAE, UAV and Mini Maker Faire.**

- **Undertake a 20-week industry placement program of structured work experience with a local, national or international organisation.**

- **There are opportunities to take your studies overseas with a student exchange program.**

**This degree is fully accredited by Engineers Australia at the level of professional engineer and recognised internationally under the Washington Accord.**

**Career opportunities Your degree could open up a range of employment opportunities, including:**

- **graduate mechanical engineer**
- **graduate project engineer (mechanical)**
- **process development engineer/scientist**
- **mechanical design engineer**
- **graduate production engineer.**

**Potential employers include:**

- BAE Systems
- Carl Zeiss
- Air Change Australia
- Woodside Energy
- Airservices Australia.

---

**Professionals and Charitable Organisation**

- Australian Defence Force
- BAE Systems
- Carl Zeiss
- Air Change Australia
- Woodside Energy
- Airservices Australia
- Naval Group (Australia)
- Raytheon Australia.

Choose from a range of majors that allow you to follow your interests and graduate ready to take on the world.

- **Majors** Bachelor of Engineering (Mechanical) (Honours)

**Electro-mechanical systems**

The development and engineering of materials enable mechanical engineers to design and manufacture products and devices with the best possible performance in service. This major focuses on the use of materials in mechanical systems. As well as the mechanical engineering topics, you will also study areas such as materials structure and characterisation, materials selection and failure analysis.

**Marine engineering**

This major focuses on the use of mechanical systems in a maritime context. Taking this major will not only provide a comprehensive mechanical degree but also cover topics such as shipbuilding and naval architecture. This major can transfer to the University of Tasmania at the end of year two to complete a specialised maritime engineering degree.

**Naval shipbuilding**

With around 15,000 skilled and professional jobs expected to be created as part of the National Naval Shipbuilding Enterprise, Flinders has partnered with the Naval Shipbuilding College and defence industry primes to ensure our graduates are ready to seize emerging defence careers.

Flinders is the first Australian University to be endorsed for delivering courses aligned with the future employment needs of the Naval Shipbuilding Industry. courses such as Bachelor of Engineering (Honours) – Mechanical, Electrical and Electronic, Robotics, Software, Maritime or our Bachelor of Information Technology (Networks and Cybersecurity Systems).

By studying Engineering at Flinders, you’ll have access to purpose-built teaching and laboratory facilities, personalised teaching, and great staff-student working relationships.
ENGINEERING

Bachelor of Engineering (Mechanical) (Honours)/Master of Engineering (Biomedical)

If you’re a high-achieving student, take a pathway that allows you to complete a program of study in mechanical and biomedical engineering in only five years. You could work towards a career in many areas in the mining, defence, manufacturing, transportation, environmental, engineering consulting, building services, automotive and petrochemical industries, or in the design and production of diagnostic and therapeutic medical equipment in hospitals, devices to assist in home-based health care and rehabilitation, and sensory and control systems.

Prerequisites
- SACE stage two specialist mathematics or mathematical methods or equivalent.
- * SACE stage two specialist mathematics or mathematical methods or equivalent.
- ** Knowledge of SACE stage two physics or equivalent is assumed.

Assumed knowledge
- English A

* SACE stage two specialist mathematics or mathematical methods or equivalent.
** Knowledge of SACE stage two physics or equivalent is assumed.
Widen your career opportunities with this future-oriented course, enabling you to choose a course of study with either an electronics or computer science focus. This degree provides you with a solid foundation in the technical and professional skills and knowledge required to pursue a successful career in the software industry.

Developed in collaboration with the Defence Science and Technology Group within the Department of Defence, this course encompasses a wide range of communication mediums including radar, radio and microwaves. A particular focus will be placed on technologies that adopt in these conjunction with studies in signal processing, infrared imaging systems, multi-spectral sensing, satellite communications, computer networks and telecommunications.

**Bachelor of Engineering (Software) (Honours)**

- SATAC code: 204431
- Prerequisites: Yes*
- Part-time available: Yes
- Guaranteed entry selection rank: 80.00
- Guaranteed entry selection rank: 75.00
- Adjustment factors: Yes

### Prerequisites
- Knowledge of SACE stage two physics or equivalent assumed.
- Knowledge of SACE stage two mathematics or equivalent assumed.

### Adjustment factors
- SACE stage two specialist mathematics or equivalent.
- Knowledge of SACE stage two physics or equivalent assumed.

**Career opportunities**

- Unique in Australia for making graduates future-ready and prepared to tackle the most challenging security problems facing Australia.
- Generous scholarships available for high-achieving students.
- Includes placements and projects in collaboration with the government and defence industry but with applicability well beyond defence.
- Developed in collaboration with the Defence Science and Technology Group within the Department of Defence.

**Career opportunities**

- Your degree could open up a range of employment opportunities, including:
  - defence research scientist/engineer
  - electronic engineer
  - electronic security specialist
  - information analyst
  - physicist
  - telecommunications engineer.

**Potential employers include:**

- BAE Systems Australia
- Unica
- CSC
- Australian National Audit Office
- Lockheed Martin.

**Scholarships available**

Flinders University in collaboration with Defence Science and Technology are excited to offer scholarships for high-performing Australian students who enrol in the combined Bachelor of Engineering Technology (Electronics Systems and Security), Bachelor of Science (Physics) course. Apply to SATAC now.

---

**Bachelor of Engineering Technology (Systems and Security)**

Paired with the Bachelor of Science (Physics), the Bachelor of Engineering Technology (Electronics Systems and Security) has been designed to develop future-ready graduates to help government, industry and academia tackle the most challenging security problems facing Australia.

It encompasses developing the requisite knowledge, skills and real-world experience in the exploitation of the electromagnetic spectrum and provides a pathway to a highly paid and enduring career at the forefront of electronic and electromagnetic technologies.

**Bachelor of Engineering Technology (Systems and Security)/Bachelor of Science (Physics)**

- SATAC code: 204471
- Prerequisites: Yes*
- Part-time available: Yes
- Guaranteed entry selection rank: 80.00
- Guaranteed entry selection rank: 75.00

**Career opportunities**

- Your degree could open up a range of employment opportunities, including:
  - defence research scientist/engineer
  - electronic engineer
  - electronic security specialist
  - information analyst
  - physicist
  - telecommunications engineer.

**Potential employers include:**

- Department of Defence and other arms of government
- defence industry
- computer and telecommunications industry
- information research and advisory organisations
- cybersecurity firms.

**Scholarships available**

Flinders University in collaboration with Defence Science and Technology are excited to offer scholarships for high-performing Australian students who enrol in the combined Bachelor of Engineering Technology (Electronics Systems and Security), Bachelor of Science (Physics) course. Apply to SATAC now.

---

**Bachelor of Mathematical Sciences (Honours)**

- SATAC code: 204461
- Prerequisites: Yes*
- Part-time available: Yes
- Guaranteed entry selection rank: 80.00
- Guaranteed entry selection rank: 75.00
- Adjustment factors: Yes

### Prerequisites
- Knowledge of SACE stage two specialist mathematics or equivalent.
- Knowledge of SACE stage two physics or equivalent assumed.

### Adjustment factors
- SACE stage two specialist mathematics or equivalent.
- Knowledge of SACE stage two physics or equivalent assumed.

- Your studies will focus on both pure and applied mathematics and statistics.
- You can choose topics in other disciplines that use applied mathematics, such as medicine, business, physics and the environment.
- You’ll develop advanced research, communication and technical skills.
- Focus on advanced pure and applied mathematics in our Mathematical Sciences Laboratory.
- The degree is designed to exceed the Australian Mathematical Society’s accreditation standards.
- Join the university that produced Australia’s Fields Medal winner, Professor Terence Tao.

**Career opportunities**

- Unique in Australia for making graduates future-ready and prepared to tackle the most challenging security problems facing Australia.
- Generous scholarships available for high-achieving students.
- Includes placements and projects in collaboration with the government and defence industry but with applicability well beyond defence.
- Articulates to the Bachelor of Engineering (Electrical and Electronic) (Honours) and the Bachelor of Science (Physics) (Honours).
- Developed in collaboration with the Defence Science and Technology Group within the Department of Defence.

**Career opportunities**

- Your degree could open up a range of employment opportunities, including:
  - research scientist/engineer
  - physicist
  - telecommunications engineer.

**Potential employers include:**

- Department of Defence and other arms of government

- computer and telecommunications industry
- information research and advisory organisations
- cybersecurity firms.

**Scholarships available**

Flinders University in collaboration with Defence Science and Technology are excited to offer scholarships for high-performing Australian students who enrol in the combined Bachelor of Engineering Technology (Electronics Systems and Security), Bachelor of Science (Physics) course. Apply to SATAC now.
**FAST**

**Flinders Automotive Solar Car Teams program (FAST)**

The Flinders solar car program has been running since 2016 and provides a global experience for Flinders students. They get to work closely with industry and leading academics in this field, and are involved as a cross-functional group to develop various aspects of the program from design, mechanical and electrical development through to biomedical support systems, software and on-board IT systems.

The program has so far seen four Flinders Automotive Solar Car Teams (FAST) complete the World Solar Challenge as part of their studies, learning and refining new skills that underpin, enhance and grow their academic learnings to produce job-ready graduates.

Read how Flinders students are leading the way in our solar car design.

“The world is set to convert 80% of its power via Power Electronics by 2030. Being involved in projects such as FAST will give you, at the very least, an appreciation for energy harvesting, conversion, storage and utilisation that will no doubt be useful in the industry.”

*Corbus Hoffman*

Design Engineer, REDARC

**Tonsley**

With more than 150 staff and 2,000 students – and a 2,000 square metre pod for heavy engineering equipment – Tonsley is a place where Flinders researchers in areas such as engineering, medical devices and nanoscale technologies combine to create the products and processes of the twenty-first century and beyond.

Tonsley embodies world’s best practice in education, teaching and research. It’s a place where innovation, collaboration and entrepreneurial spirit combine to create the products and processes of the twenty-first century and beyond.

Tonsley is located centrally between Flinders University’s Bedford Park campus and Adelaide city. It’s connected to the city by train, offering convenient access 15 minutes from the city’s CBD. And Tonsley is a five-minute car ride, a 15-minute ride on the Flinders loop bus or a 30-minute walk from the Bedford Park campus.

Tonsley is in touch with industry. Study alongside industry leaders and gain valuable career-ready skills.

For more information visit: flinders.edu.au/engineering
Combined degrees can enhance your job prospects

By combining your degree with a qualification in another discipline, you’ll connect diverse knowledge in unique ways and develop specialised abilities to help you stand out from the pack. Studying a combined degree at Flinders is the key to enhancing your career opportunities. Example degree combinations:

Bachelor of Engineering (Environmental) (Honours)/Bachelor of Science (Environmental Science)

SATAC CODE 244401

With the problems faced by the environment becoming more critical, environmental scientists and engineers are in very high demand. Flinders University offers a unique double degree that combines environmental engineering with environmental science. You’ll graduate with two separate degrees, greater career prospects and a competitive edge in the job market.

Bachelor of Medical Science/Bachelor of Engineering (Biomedical) (Honours)

SATAC CODE 214421

Broaden your career opportunities by combining specialised medical science studies in areas such as biochemistry, biotechnology, microbiology, molecular biology, neuroscience and more, with the skills to investigate, plan, design, manufacture and maintain systems and equipment that are used in all aspects of health care.

For a full list of combined degree options visit flinders.edu.au/combineddegrees

There’s more than one way to get into an engineering degree at Flinders

At Flinders, there are multiple entry pathways you can study to become an accredited engineer, even if you:
- have minimal maths and physics background
- don’t know what area of engineering you want to specialise in
- have a lower ATAR than you had hoped for
- finished school some years back.

Flinders’ engineering courses have a common first year which enables you to get a taste of engineering disciplines and delay your choice of specialisation until you have experienced engineering as a whole, or transfer between courses if you change your mind.

Bachelor of Engineering (Honours) – Flexible Entry

Get a taste of engineering before choosing your specialisation. Embark on a first-year engineering degree without choosing the engineering specialisation you wish to pursue with the Bachelor of Engineering (Honours) – Flexible Entry. At the end of your first year, you can transition to a named engineering degree of your choice without having to study the standard four-year course.

Bachelor of Engineering (Honours) — General Entry

A feeder to engineering for those with less mathematics, Flinders’ general entry pathway to the Bachelor of Engineering (Honours) provides a guaranteed entry pathway for students who have passed SACE stage two general mathematics or SACE stage one mathematics. The course includes additional mathematics and physics, enabling students to transfer into and complete any of Flinders’ Bachelor of Engineering (Honours) degrees in 4.5 years or less.

Bachelor of Engineering Science

Gain the foundations for further study in engineering or for a career in an engineering-related field. The degree offers specialisations in biomedical engineering, civil engineering, electrical engineering, electronic engineering, mechanical engineering, software engineering, and design and technology.

Bachelor of Engineering Science

Plan your trip to Flinders:
adelaidemetro.com.au/routes/flndrs

The Flinders railway line is now open
The new Flinders train line has made travel easier and more convenient than ever, linking Bedford Park to our Tonsley campus and the Adelaide city centre, now just 22 minutes away.

A new link from the north
Opened in June 2022, the electrified Gawler Rail Line provides services from the northern suburbs to the CBD, with express services expected to take around 48 minutes from Gawler to the CBD.

Plan your trip to Flinders CBD:

Get more out of your study

Begin your journey to a successful career

Pathways to study

Combined degrees

Combining your degree with a qualification in another discipline will give you more expertise and expand your career prospects. Studying a combined degree at Flinders will help you stand out from the crowd. Our combined degree programs are designed to enhance your educational, academic and professional qualifications while minimising the cost and length of your studies. Flinders’ combined degrees allow you to undertake in-depth study in exciting combinations that aren’t usually available in single degrees.

flinders.edu.au/combineddegrees

Flinders diplomas

Flinders’ diploma-level qualifications give you the chance to experience university life without having to commit to long-term study. The one-year Diploma in Business, Diploma in Laws, or Diploma in Arts allow you the chance to explore a range of interests, and successful completion allows you to apply for up to one year of credit towards a range of bachelor degrees, and guaranteed entry to the following courses:

- Bachelor of Archaeology
- Bachelor of Arts
- Bachelor of Business
- Bachelor of Business (International Business Management, Marketing, Sports Management)
- Bachelor of Business Economics
- Bachelor of Creative Industries (Digital Media, Film and Television, Interactive Design, Theatre and Performance, Writing and Publishing, Festivals and Arts Production)
- Bachelor of Disability and Community Inclusion
- Bachelor of Disability and Developmental Education
- Bachelor of Engineering Science
- Bachelor of Information Technology

If you achieve an ATAR equal to or above the published guaranteed entry selection rank (and you meet course prerequisites) you will be guaranteed a place at Flinders. We offer guaranteed entry for most courses.

flinders.edu.au/year12

If you have secondary education

Year 12 Entry

Most Year 12 applicants enter university via the traditional entry method, where offers are made to eligible applicants with the highest selection rank until all places in the degree are filled. Your selection rank is used by Flinders to assess your admission to a course and is based on your ATAR plus any adjustment factors for which you are eligible.

flinders.edu.au/year12

Guaranteed entry

If you’ve officially represented your school or state at a national level competition, we’ll consider your school’s recommendation about your academic potential when you apply.

flinders.edu.au/study/pathways/year-12-entry/research-project

If you haven’t achieved the results you expected

uniTEST

If you haven’t achieved the results you expected in Year 12, there are a number of pathways to your preferred degree. You can start studying one course and move to another via internal transfer or FlindersLink.

flinders.edu.au/study/pathways/flinderslink

uniTEST is available to enhance your chances of getting into Flinders. We will select students based on their Year 12 results (60% weighting toward the ATAR selection rank) and uniTEST results (40%). Flinders will also consider applicants based on their uniTEST results (100%) as a standalone entry score (subject to SACE completion and any course prerequisites or specific admissions requirements). If you take the test and don’t do well, we will only consider your highest selection rank.

flinders.edu.au/unitest

Elite Athlete Pathway

If you’ve officially represented your school or state at a national level competition, we’ll consider your school’s recommendation about your academic potential when you apply.

flinders.edu.au/study/sport/elite-athletes

Research Project B Pathway

If you have strong results in the Research Project B subject you will be considered for entry into Flinders on the basis of your Year 12 results and Research Project B performance.

flinders.edu.au/study/pathways/year-12-entry/research-project

School Recommendation Program

We may consider your school’s recommendation about your academic performance as part of your admission into Flinders.

Pathways to study

If you have work and life experience

Foundation Studies
The Foundation Studies program has been designed to introduce you to university study in a supportive learning environment. Open to people from all backgrounds, Foundation Studies provides a pathway to gain entry to most degrees at Flinders and offers guaranteed entry into some degrees.
funders.edu.au/study/pathways/foundation-studies

Military Pathways
Use your military service in the Australian Defence Force as a pathway to a Flinders University degree.
funders.edu.au/study/pathways/military-veterans

Special Tertiary Admissions Test (STAT)
Adult entry to university via the Special Tertiary Admissions Test (STAT) enables people aged 18 years and over to apply to study at Flinders via the Special Tertiary Admissions Test (STAT). Applications are made via SATAC.
satc.edu.au/stat
Alternatively, you may wish to consider an undergraduate certificate or diploma. These shorter courses allow you the opportunity to explore your interests and to progress to further study. Certificate courses are Commonwealth supported.
funders.edu.au/pathways

If you have some higher education

Tertiary Transfer
If you have completed at least one semester of full-time equivalent study at university, you may be able to transfer to study at Flinders University using your grade point average (GPA).

TAFElink
Flinders offers guaranteed entry to selected degrees for applicants who have completed a TAFE/VET Certificate IV or higher-level qualification, as long as degree prerequisites are met.
funders.edu.au/tafe

TAFE SA Dual Offers
Flinders University together with TAFE SA offer dual offer pathways in various disciplines.

Whatever you decide to study at Flinders, we’re always here to help you succeed.

Careers & Employability Service
The Careers and Employability Service helps you the edge in your career. CareerHub, our online employment portal, offers personalised job opportunities, career planning, programs to help you broaden your skills and experience, access to employer events and career-related resources. Whatever you are studying, CareerHub can help you find your direction and start your career.
funders.edu.au/careers

Flinders Connect
Flinders Connect can help with everything from enrolment and fees to exams and graduation. You can also access Flinders Connect for specialist services in admissions, careers and IT help. A range of support services is also available.
funders.edu.au/flindersconnect

Flinders Library
Our extensive library is more than a book repository. We provide a range of services such as computing and printing, document delivery and one-on-one librarian appointments for assistance with search strategies and finding resources for your assignments.
library.flinders.edu.au

Flinders Living
Flinders is the only university in Adelaide that gives you the opportunity to live on campus, and both University Hall and Deirdre Jordan Village are located within the Bedford Park campus. The wide range of social, sporting and community activities also enhances the student experience at Flinders Living.
funders.edu.au/living

Flinders University Student Association
The Flinders University Student Association (FUSA) continues a long tradition of active student involvement and represents the rights and interests of students. FUSA manages social events, non-sporting clubs and societies, and the student publication Empire Times, and helps with academic, administrative and welfare issues.

Indigenous Admission Scheme

The Indigenous Admission Scheme provides an alternative pathway for Aboriginal and Torres Strait Islander people, who may not have been able to gain entry to university by traditional means, with the opportunity to study at Flinders.

Are you eligible?
To be eligible for the Indigenous Admission Scheme you must be an Aboriginal or Torres Strait Islander person in accordance with the Commonwealth definition, which requires you to:
• be of Aboriginal or Torres Strait Islander descent, and
• identify as an Aboriginal or Torres Strait Islander, and
• be accepted as an Aboriginal or Torres Strait Islander in the community in which you live or have lived. You may be currently studying Year 12 or be a non-school leaver.

How to apply
1. Apply for the course you want to study through the South Australian Tertiary Admissions Centre (SATAC). You will get an application number from SATAC that you will need for your Indigenous Admission Scheme application form.
2. Complete the Indigenous Admission Scheme application form online (flinders.edu.au/indigenousadmissions). If you are having trouble completing an online application, you can request a paper based application via ias@flinders.edu.au or call us on 08 8201 3033.
3. An interview is part of the application process, but you will be notified about this.

Application and interview dates
First round applications close early January for semester 1. For our midyear intake to a number of courses, applications close in June.
flinders.edu.au/indigenousadmissions

“I originally chose Flinders as they have one of the best facilities for future teachers and fantastic student engagement. Studying at Flinders has been a wonderful experience that has given me the opportunity to discover what I truly want into the future while also providing me with support in every way imaginable. Flinders and Yungkurrinthi have given me the opportunity to meet others with similar ambitions and goals as myself and find the benefit of an education in places I would never have thought to look. As a proud Indigenous woman, I want to use my degree to work in First Nation communities to help our young people make it through their high schooling experience and onto their own future aspirations.”

Emilee Pyrke
Bachelor of Arts, Conditional entry to Master of Teaching (Secondary)

Study abroad/scholarships

Over 450 scholarships worth $2.4 million in total – ranging from $1,000 to $20,000.

Take your studies overseas

Why wait until you graduate to explore the world? Flinders’ Learn Without Borders could see you studying overseas, gaining a unique perspective and immersing yourself in a different culture, language and lifestyle. Our global study programs are designed to allow students to take their Flinders study overseas and earn academic credit toward their Flinders program. With 70+ overseas partner universities, why wait until you graduate to see the world?
flinders.edu.au/learn-without-borders

“Take your studies overseas at some stage during my degree. A semester exchange gave me the chance to complete topics that weren’t available in my home university and experience life in a city that is very different to my own. Having completed a semester overseas, I now have an edge over the countless other students that are completing the same degree as me and have formed memories that will always stay with me.”

Annelise Smith
Bachelor of Business (Advanced Leadership)

Explore Flinders scholarships

Flinders offers a generous range of scholarships for students in undergraduate courses. With over 450 available scholarships, including scholarships to students from low socio-economic backgrounds, students from rural and regional areas, and Aboriginal and Torres Strait Islander students, you may be eligible for support that will help you achieve your goals at university.
flinders.edu.au/scholarships

“The Wyndham Richardson Scholarship Fund has been invaluable to reduce the financial pressure during studies, especially now that I am in the later years of my degree.”

Ryan Rowston
Bachelor of Computer Science
Wyndham Richardson Scholarship Fund recipient
How to apply

Flinders offers two admissions cycles each year for undergraduate degrees.

Semester 1 – March start
Applications open in August for commencement the following year.

Semester 2* – July start
Mid-year applications open in August for commencement in July the following year.
* Not all degrees are offered for semester 2.

Key dates
Flinders Open Days: Friday 12 August, Saturday 13 August 2022
Semester 1 Orientation week: 20 February 2023
Semester 2 2023 start date: 17 July 2023
Semester 2 Orientation week: 24 July 2023

Fees and charges
Your course fees – Commonwealth support
All our courses list indicative fees, but as an undergraduate student your course is Commonwealth supported provided you’re an eligible Australian citizen, New Zealand citizen or permanent resident. Your course being Commonwealth supported means that your course fees are shared between the Australian government and you – with your portion being the student contribution amount.

HECS-HELP loan
You won’t have to pay your fees up-front if you’re an Australian citizen or holder of a permanent humanitarian visa. You can get a HECS-HELP loan for your student contribution portion of your uni fees. Find out more about costs to plan for while you’re at uni at flinders.edu.au/fees

Visit us

When can I start?

Glossary

There are many terms used within a university that may be unfamiliar or confusing. Below are a few terms that may need explanation.

Admission pathway
Any one of the options available to a prospective higher education student that will enable them to meet the entry requirements of their chosen courses.

ATAR
The Australian Tertiary Admission Rank (ATAR) is a ranking from 30 (lowest) to 99.95 (highest) agreed by COAG as a nationally equivalent measure of a person’s relative academic ranking within their complete age cohort in the year they graduated from senior secondary school.

Adjustment factors
Often referred to as ‘bonus points’, these are additional points that may be used in combination with an applicant’s university aggregate to derive a person’s course selection rank.

Defer
Delaying the start of a course of study by one year (commencing students only). If you have already enrolled, then you need to withdraw from topics before you can defer.

Not all courses are deferrable, please visit flinders.edu.au/defer for details.

Guaranteed entry selection rank
Achieve a selection rank equal to or above the published guaranteed entry selection rank and you’ll be guaranteed a place at Flinders.

Major
A sequence of topics required to be taken as defined in your course rule, normally across all years of a course.

Minor
A sequence of topics required to be taken as defined in your course rule, generally as part of a major.

Offer round/s
Refers to the series of dates on which offers of higher education places are issued to applicants throughout the year, whether through a tertiary admission centre or directly by a higher education provider.

Selection rank
The ranking that tertiary admission centres and most universities actually use to assess admission to a course. A person’s course selection rank can include their ATAR, any adjustments they are eligible for, such as equity or subject adjustments, other contributions calculated on the basis of work experience or previous non-secondary study, portfolio assessments, results of the Special Tertiary Admissions Test, other supplementary tests, etc.
