Taking your first step into university life is a big change. New faces, new spaces, new experiences.

That’s why at Flinders, we do all we can to make your time at university the best it can be.

Our facilities are purpose-built for your study needs, providing the best the world has to offer.

Plugged into industry trends, professional placements and practical experiences, our teaching is designed to take you from learning to earning.

Our researchers and lecturers are ready to equip you with up-to-the-minute knowledge based on our world-class research. You’ll gain specialised skills and knowledge in your chosen field plus develop abilities in independent thinking, communication, collaboration, ethics and creativity – qualities that will prepare you to become an expert and innovator in your field.

Everything we do at Flinders is designed to give you the best possible study experience and prepare you not just to succeed, but to go beyond.

Bachelor of Applied Geographical Information Systems

Create a career mapping the complexity of our world.

In this degree, you’ll be taught skills to support change and growth in areas like urban planning, mining and exploration, archaeology, transportation, and biodiversity management.

You’ll gain the expertise to use smart technologies to tackle real-world problems, and prepare for a variety of career paths related to the capture, synthesis, analysis and communication of spatially related information.

The degree meets the growing need for specialists who know how to use these highly sophisticated systems. Graduate ready for a rewarding career in the field.

Bachelor of Science

Imagine a career exploring science from its core to the outer limits.

You don’t need a science background to start a career in science, you just need an inquiring mind.

This degree will equip you with crucial transferable skills in problem solving, communication, teamwork and computing, that will open up career pathways and research opportunities in a broad and exciting range of professional areas.

Bachelor of Science

• Follow your interests in core sciences from a diverse range of disciplines.
• You have the flexibility to explore a specific area while getting a broad foundation in science by studying a major, or gaining more specific expertise and a named degree by studying a specialisation.
• The degree provides you with practical experience that prepares you for the workplace through project-based learning.

Career opportunities

Your degree is the first step towards a range of employment opportunities, including:

• laboratory technician
• intellectual property analyst
• bioinformatics technician
• research assistant
• graduate ecologist.

Potential employers include:

• GHD
• Bureau Veritas Australia
• CSIRO
• SA Water
• Department of Agriculture.

flinders.edu.au/science
Bachelor of Science (Honours) – Enhanced Program for High Achievers

Make the most of your academic abilities.

Discover where science can take you and where you can take science. If you’re a student of exceptional academic ability, this enhanced program provides opportunities to embark upon research in every year of the degree.

Bachelor of Science (Honours) – Enhanced Program for High Achievers

- **Deferrable**
  - 2019 Minimum Selection Rank: 70.00
  - TAFELINK: Cert IV or above
  - SATAC Code: 234211
  - Assumed Knowledge: Mathematical methods (2MHS20) from mathematical methods, specialist
  - At least three of the following SACE FACTORS UES, LLM
    - Advanced Dip
    - TAFELINK
    - GUARANTEED ENTRY
    - Yes*

  - **Full-time** Number of Years: 4 PT
  - 2019 Minimum Selection Rank: 70.00 (Biodiversity and Conservation)
  - Prerequisites: None
  - Assumed Knowledge: None
  - TAFELINK: Cert IV or above

**Bachelor of Science (Honours) – Animal Behaviour**

Work with animals to understand their evolution, behaviours, and how species interact with each other.

Become a scientist by learning about the behaviour of insects, birds, fishes, and mammals. Throughout this degree, experts in animal behaviour will teach you how to collect, analyze, and understand information relevant to animal behaviour, and how to communicate this information to a variety of audiences.

- **Deferrable**
- **Full-time** Number of Years: 4 PT
- 2019 Minimum Selection Rank: 80.00 (Biodiversity and Conservation)

Flinders gives you the flexibility to choose from major areas of study across the University’s wide range of science disciplines.

**MAJORS**

- The broad range of majors enables you to construct a study program that suits your interests. The following major areas of study are available at Flinders:
  - Animal biology: The animal biology major involves the study of living terrestrial, aquatic and aquatic animals.
  - Aquatic biology: Aquatic biology involves the biology of marine and freshwater aquatic life.
  - Biochemistry and molecular biology: The biochemistry and molecular biology major explores the building blocks of life.
  - Chemistry: Chemistry affects almost everything we do or use: from drugs, antibiotics and anaesthetics to polymers and plastics through to synthetic fibres and batteries.
  - Cognitive science: Cognitive science is the scientific study of the mind and its processes in both human and machines.
  - Computer science: The computer science major provides you with a broad background in programming, databases, networks and computer systems.
  - Ecology and evolutionary biology: The ecology and evolutionary biology major introduces you to the study of living animals, plants and fungi.
  - Environmental geology: The environmental geology major examines how geological processes shape the environment and how they influence human activities and vice versa.
  - Environmental hydrology and water resources: The environmental hydrology and water resources major gives you a broad background in natural sciences including earth sciences, environmental sciences and marine sciences.
  - Environmental management: The environmental management major aims to give you an understanding of the complexity and contexts of environmental decision-making.
  - Geography: The geography major provides a broad foundation in geography.
  - Mathematics: The mathematics major provides a firm foundation in the basic principles and techniques of modern mathematics.
  - Microbiology: The microbiology major involves the study of evolution, biodiversity, chemistry, biostatistics and immunology.
  - Ocean and climate sciences: The ocean and climate sciences major provides you with a deeper understanding of the physical processes shaping the marine environment and influencing climate.
  - Physics: The physics major provides an understanding of the fundamental laws of nature.
  - Plant biology: The plant biology major involves study in areas including Australian environmental change, diversity of plants and algae, animal and plant physiology and food biotechnology.
  - Statistics: The statistics major involves the study of mathematics, data science, biostatistics, probability and stochastic processes to analyse and solve complex statistical problems.
Bachelor of Science (Biotechnology)

Learn how living organisms can benefit people and the environment.

Graduate prepared to work as a professional in one of the most exciting areas of modern science by combining theory and specialised practical training in the life sciences, with the study of related business, legal, ethical and social issues.

You don’t need a background in science, just an inquiring mind.

Practical lab sessions prepare you for a scientific career.

You’ll have the opportunity to undertake project placements within the University, Flinders Medical Centre or the biotechnology industry.

Participate in one-on-one mentoring sessions with industry and medical research leaders.

Understand science in the global market through commercialisation, entrepreneurship, financial management and business.

CAREER OPPORTUNITIES

Your degree could lead to a range of employment opportunities, including:

- biotechnologist
- bioanalytical quality assurance associate
- bioscience research officer
- graduate research assistant
- medical information associate.

Potential employers include:

- Australian Centre for Plant Functional Genomics
- Bioinformatics
- Department of Industry, Innovation and Science
- Murdoch Children’s Research Institute
- Novozymes.

Bachelor of Science (Chemical Sciences)

Build a career in the science central to all other sciences.

Gain a broad-based foundation in chemistry, acquire extensive knowledge in the area, and graduate job-ready.

You’ll learn how to understand and apply chemical principles to solve problems, master lab techniques and equipment, undertake chemistry research and communicate your findings.

You don’t need a background in science, just an inquiring mind.

Practical lab sessions prepare you for a scientific career.

You’ll have the opportunity to undertake project placements within the University, Flinders Medical Centre or the biotechnology industry.

Participate in one-on-one mentoring sessions with industry and medical research leaders.

Understand science in the global market through commercialisation, entrepreneurship, financial management and business.

CAREER OPPORTUNITIES

Your degree could lead to a range of employment opportunities, including:

- analytical chemist
- assistant formulation chemist
- graduate chemist
- graduate quality control chemist
- laboratory metallurgical technician.

Potential employers include:

- DuluxGroup
- Adent Pharmaceuticals Pty Ltd
- MyPhysonics Pty Ltd
- Western Australia Specialty Alloys (WASA)
- SA Water.

Bachelor of Science (Coasts and Oceans)

Build a career helping us understand and manage our marine and ocean systems.

Your degree could lead to a range of employment opportunities, including:

- coastal and estuary officer
- coastal ocean modeller
- coastal programs officer
- marine planning project officer
- oceanographic officer.

Potential employers include:

- Cardno
- CSIRO
- Bureau of Meteorology
- Department of Environment and Water
- South Australian Research and Development Institute.

Bachelor of Science (Energy and Advanced Materials)

Dive into the science of our coasts and oceans.

Calculate the forces and resources for the modern technological world.

Calculate the forces and resources for the modern technological world.

Prepare for a rewarding career and gain a solid foundation in physics and cutting-edge materials.

As new energy sources and new technologies emerge, new opportunities will open up in this exciting field. This degree prepares you to understand physics and materials at a deeper level, apply scientific principles in a materials context, appreciate experiment design and execution, and use scientific instruments commonly used in physics and materials.

Use your maths ability as a language for physics and applications of materials.

Operate scientific instruments commonly used in physics and materials.

Be prepared and present information about physics in a scientific manner, including communicating effectively with a variety of audiences.

The degree provides you with practical experience that prepares you for the workplace through the opportunity of a professional placement in your third year.

CAREER OPPORTUNITIES

Your degree could lead to a range of employment opportunities, including:

- fibre optics designer
- electronic device developer
- focused ion-beam scientist
- electronics technology
- electronics engineer
- process validation group scientist.

Potential employers include:

- Defence Science and Technology Group
- ANSTO
- CSIRO
- Department of Industry, Innovation and Science
- BAE Systems.

Bachelor of Science (Engineering and Advanced Materials)

Find out more
flinders.edu.au/science
Bachelor of Science (Environmental Science)

Combine science disciplines to create a career tackling environmental challenges.

This degree focuses on understanding, monitoring and improving the environment. Expand your knowledge, obtain skills, and learn critical thinking about environmental issues and problems.

Graduate prepared to work as a professional in one of the most exciting areas of modern science by combining theory and specialised practical training in the life sciences with the study of related business, legal, ethical and social issues.

- You don’t need a background in science, just an inquiring mind.
- Examine how natural processes and their changes impact human society, and how human activities interact with and modify environments.
- Understand the components of the earth system: atmosphere, biosphere, hydrosphere and geosphere.
- Recognise major environmental issues at the global, national and local scales.
- There are opportunities to take your studies overseas through internships and short-term study abroad programs.

CAREER OPPORTUNITIES

Your degree could lead to a range of employment opportunities, including:
- environmental scientist
- environment protection officer
- water policy officer
- environmental education officer
- environmental scientist
- environment sustainability adviser
- environmental project manager.

Potential employers include:
- Murray-Darling Basin Authority
- Department of Environment and Water
- Bureau of Meteorology
- Environment Protection Authority
- SA Water
- City councils
- Mining industry such as Rio Tinto
- Consulting firms such as Jacobs
- Research institutes such as CSIRO.

Find out more

flinders.edu.au/science

Bachelor of Science (Forensic and Analytical Science)

Work towards a fascinating career using chemistry to analyse details and solve big problems.

Undertake one of two streams. Forensic and analytical chemistry combines the practices of analytical chemistry and forensic investigation. Forensic biology uses aspects of life sciences to examine biological material in a forensic context.

Get hands-on experience during laboratory practicals and learn how forensic technologies are applied to real life cases.

- Your degree opens career options in areas such as illicit drug testing, DNA analysis, trace evidence examination and toxicology.
- This degree has strong links with Forensic Science South Australia and other agencies and researchers around the world.
- You’ll be able to access research facilities among Australia’s best.
- Undertake research in the field.
- There are opportunities to take your studies overseas with a student exchange program.

CAREER OPPORTUNITIES

Your degree could lead to a range of employment opportunities, including:
- forensic chemist, forensic biologist or forensic toxicologist
- analytical chemist
- forensic technical assistant
- formulation chemist
- graduate chemist.

Potential employers include:
- Forensic Science SA
- Australian Federal Police
- Defence Science and Technology Group
- Victorian Institute of Forensic Medicine.

"Choosing Flinders gave me an opportunity to study forensics in a broad way by covering laboratory vs field options and biological vs chemical forensics for future pathways. I feel confident knowing that my teaching staff have my best interest at heart and I can meet with them if I have any questions to gain clarity in lecture and assessment content. This ensures my own goals are met and I get the best outcome for my end of semester results. The campus has beautifully set up study areas that were designed around human interaction that people can immediately feel comfortable in. Flinders fulfills all my expectations and checks all my boxes." — Gabrielle Ziersch, Bachelor of Science (Forensic and Analytical Science)
Bachelor of Science (Geography)

Learn about the world from a variety of angles, and turn that knowledge into a rewarding career.

Geography graduates have skills and attributes that make them highly employable in a great variety of fields across both government and non-government sectors in Australia and globally.

Bachelor of Science (Geography) (3 PPT)

The range of specialty areas and career opportunities in marine biology are expansive.

Bachelor of Science (Marine Biology) (Marine Biology and Aquaculture)

Imagine a career exploring the living marine world.

Combine studies in aquacultural production technologies and business skills with scientific study of the diversity of life in the sea. This double specialisation will equip you to take up positions in either the research or applied science sectors.

Bachelor of Science (Marine Biology and Aquaculture) (Hydrology)

Apply the science of sea life to the business of aquaculture.

There are marine biologists who study the basic biochemistry of marine organisms, or the growth or behaviour of individual plants or animals. Some adopt an even larger perspective and study how entire marine ecosystems function.

RANKED 12TH IN THE WORLD FOR WATER

Based on rankings in the Global Ranking Academic Subjects 2018 – Water Resources.
Bachelor of Science (Molecular Biosciences)

Understand and manipulate the building blocks of life.

Gain a broad foundation in molecular bioscience together with extensive subject knowledge in specialised topics such as molecular biology, biochemistry and microbiology. Practicals help you graduate job-ready and enable you to master a diverse set of laboratory skills that can be applied to many of today’s most crucial scientific problems.

Bachelor of Science (Molecular Nanotechnology)

Start a career in the ‘industrial revolution of the 21st century’.

Equip yourself to be part of the exciting world of nanotechnology. The degree provides you with a background in physics, chemistry and biology, complemented by insights into business, enterprise management, commerce, and legal issues such as intellectual property – all vital components for scientists working in business and industry.

There are many opportunities for graduates who wish to work in a commercial environment.

Bachelor of Science (Palaeontology)

Turn your passion into a career with Australia’s only palaeontology degree.

Gain a solid foundation in physics and mathematics, and acquire extensive knowledge in the area. You will learn to understand physics at a deeper level, apply scientific principles in a physics context, and understand the role of physics in society.

Bachelor of Science (Physics)

Master the enabling science that will help prepare you for a technical career.

New to Flinders in 2019, the Bachelor of Science (Palaeontology) will provide you with the tool set necessary for palaeontological careers anywhere in the world, whether your interests include working in a museum, evolutionary studies, fieldwork, ecological/environmental research, teaching or science communication.

Bachelor of Mathematical Sciences

Master mathematics to solve real-world problems.

Mathematics is the foundation of many industries. Demand for mathematics graduates is particularly strong in areas including science, engineering, technology and business, and in areas as diverse as logistics and health. Your skills and knowledge of mathematics could lead to a challenging, long-term career.

In this degree you’ll gain a foundation in the principles and techniques of modern mathematics, and learn how to apply these skills to solve today’s problems. The degree is designed to produce industry-focused graduates who are in demand in a range of careers that use mathematics.

Broaden your opportunities

Explore your interests and unlock more career opportunities by combining degrees.

Combining your degree with a qualification in another discipline will help you develop specialised abilities to stand out from the pack. Studying a combined degree at Flinders is the key to enhancing your career opportunities.

Find out about combining your qualifications at flinders.edu.au/combined-degrees

Bachelor of Health Sciences/Graduate Diploma in Environmental Health Practice

Understand the effects of environmental factors on human health.

Qualify to practice as an environmental health officer and develop the knowledge required to promote community understanding of environmental health issues. The degree prepares you to integrate the many disciplines that make up environmental health, including public health, to improve the health of communities.

Transition to university

Starting at university is a big step, let’s make it easier.

The Transition Office can help you make your shift into university study as smooth as possible, and the Student Learning Centre provides a range of services from writing and mathematics support to assistance with study and time-management skills.

Work-Integrated Learning

Work-Integrated Learning (WIL) enables you to gain work experience while you study. Flinders aims to provide each and every student with access to a WIL opportunity during their studies through placements, practicums, field studies, and simulated workplace settings and assessment activities.

Scholarships

Find out about more undergraduate scholarships, worth $2.2M in total. A generous range of scholarships is available to new and continuing undergraduate students.

Flinders Connect

Flinders Connect can help with everything from enrolment and fees to exams and graduation. You can also access Flinders Connect for special services in admissions, careers and IT help. A range of support services is also available.

Flinders University Student Association (FUSA)

Flinders has a long history of active student involvement. The Flinders University Student Association (FUSA) continues that tradition, and represents the rights and interests of students. FUSA manages social events, non-sporting clubs and societies, the student publication Empire Times, and helps with academic, administrative and welfare issues.

CAREERS & Employability Service

The Careers and Employability Service helps you to develop the ‘personal enterprise skills’ that employers are looking for, and equip you with the ability to adapt to whatever life throws at you, personally and professionally.

We’re here to help

Whatever you decide to study at Flinders, we’re always here to help you succeed.
How do I apply?

Applicants need to apply through the South Australian Tertiary Admissions Centre (SATAC): satac.edu.au

To find out more about your admission pathways to Flinders, visit: flinders.edu.au/pathways

ADMISSION PATHWAYS

At Flinders we recognise that every prospective student is an individual and that what works for one might not be right for another. That’s why we provide various admission pathways into Flinders University and your preferred degree. You’re encouraged to explore your options and find the entry path that’s right for you.

Year 12 entry

The majority of Year 12 applicants enter university via the traditional competitive entry method, where offers are made to eligible applicants with the highest selection rank until all places in the degree are filled. Your selection rank is used by Flinders to assess your admission to a course, and is based on your ATAR plus any adjustment factors for which you are eligible. The 2019 Minimum Selection Rank is the minimum selection rank required for consideration to enter in next intake. The 2019 selection rank indicates the lowest rank for which an offer was made to an applicant in that degree for the previous year (including any adjustment factors). This selection rank is provided only as a guide for 2020 entry as it may change from year to year.

Adjustment factors

Adjustment factors (formerly referred to as bonus points) may be used in combination with your ATAR to derive your course selection rank. Adjustment factors may be available for South Australian Year 12 students applying for entry to Flinders in 2020: the SA Universities Equity Scheme (USES) and the SA Language, Literacy and Mathematics Bonus Scheme (LLM).

Guaranteed entry selection rank

Achieves a selection rank equal to or above the published guaranteed entry selection rank and you’ll be guaranteed a place at Flinders. All you need to do is ensure you have listed Flinders first in your preferences and you will be offered a place in the highest Flinders degree preference that you are eligible for in 2020.

UNITEST

If you’re a school leaver, unTEST is your chance to increase your options to gain a place in your preferred degree. unTEST is designed for school leavers and complements existing selection criteria by enhancing your overall selection rank.

UNITEST can help you qualify for entry into a Flinders University degree in four weeks. It’s a free intensive four-week program that has been designed for school leavers, to develop their independent learning skills and prepare them for university study.

Foundation Studies

The Flinders’ Foundation Studies Program has been designed to introduce you to university study in a supportive learning environment. Open to people from all backgrounds, Foundation Studies provides a pathway to gain entry to most degrees at Flinders and offers guaranteed entry into some degrees.

TAFElink

Flinders offers guaranteed entry to selected degrees for applicants who have completed a TAFE/ VET certificate IV or higher-level qualification, as long as degree prerequisites are met. Importantly, your TAFE/VET qualification does not need to be related to your selected area of study at Flinders.

TAFE SA dual offers

You can apply for a TAFE SA diploma or advanced diploma that is linked to a Flinders degree. You’ll receive an offer to both TAFE SA and Flinders University and, on successful completion of the TAFE course, you’ll have secured an offer for a Flinders degree. TAFE SA dual offers are available for a range of Flinders degrees.* TAFE SA RTO Code: 41026

Adult entry

The adult entry scheme enables people aged 18 years and over to apply to study at Flinders via the Special Tertiary Admissions Test (STAT). Applications are made via SATAC.

Tertiary transfer

If you have completed at least one semester of full-time equivalent study at university, you may be able to transfer to study at Flinders University using your grade point average (GPA).

BACHELOR OF GENERAL STUDIES

The Bachelor of General Studies is a flexible degree that provides a sound basis of knowledge in an area of your choice. It is designed to prepare you with communication skills, a firm grasp of ethics, and the confidence to make connections across geographical, disciplinary, social and cultural boundaries. Successful completion of the first year to the required standard also provides you with guaranteed entry into a range of our degrees.

Get more out of your degree

Whatever you’re studying, Flinders gives you the opportunity to do more with your degree to help you have a competitive edge when you graduate.

A combined degree is a combination of two Flinders bachelor degrees, meaning you will have two qualifications in just one to one-and-a-half years of extra study and undertake in-depth study in exciting combinations that aren’t usually available in single degrees.

The Bachelor of Letters is available to study alongside any degree at Flinders and enables you to graduate with two qualifications.

WHEN CAN I START?

Flinders offers two admissions cycles each year for undergraduate degrees.

Semester 1 – February start

Applications open in August for commencement in the following year.

Semester 2 – July start

Mid-year applications open in August for commencement in July the following year.

*Not all degrees are offered for semester 2 entry. Check our midyear site for details: flinders.edu.au/midyear
