

Study *Project Management*

Lead with confidence in any industry.

Qualified project leaders are in high demand across Australia, driving success in construction, health, IT, infrastructure and government sectors.

Our project management courses prepare you for senior roles where you'll lead teams, oversee projects, and align outcomes with strategic goals.

Career ready courses

Project management experts are essential in today's evolving global economy. Our courses help prepare students for senior leadership roles managing complex programs and portfolios across a variety of sectors.

Practical learning

In our master's course, you will engage with industry, lead complex projects, and manage procurement and contracts.

Unique study options

We offer staggered qualifications as you complete certain milestones. Finish four topics and you'll receive a graduate certificate. Finish another four topics, and you'll receive a graduate diploma. Complete a further four topics in addition to those, and you will be awarded a Master of Project Management.
