

# Study *Public Health*

## Help those around you to live healthier lives by studying Public Health at Flinders.

Our Public Health courses create opportunities for health professionals to examine workplace issues and to formulate new ways of addressing them. You'll learn to apply knowledge, values, and practice that help reduce inequity in health care access and outcomes across the world.

### Globally recognised qualifications

Professionally accredited programs with globally recognised qualifications that increase your job opportunities worldwide.

### Graduate career ready

Practical placements help you graduate career ready with graduates expected to progress into employment in public health policy, management and practice.

### Specialisation pathways

Multidisciplinary degrees across a broad range of health-related study areas can help improve employment opportunities.

*“I was fortunate to be placed at Diabetes SA for my placement which centred around leading and reporting on a community-based research study. This was precisely the kind of placement I was after as it allowed me to translate theory into practice.”*

Angela Semanda, Master of Public Health
